Thanks to new chemistry, modern hair coloring is much less of a threat to the texture of the hair... Many of the same softening, cream conditioners used in expensive skin preparations have been included into color formulas, and consequently, they have been known to improve the texture of the hair. So, ladies, don't hold back any longer... Give yourself a new lift with a new look...

A few more tips on hair coloring: Keep a lock of your original color so if you want to switch back, you will have something to match... Have a permanent first, since permanent waving always changes the color of tinted hair to a certain degree... Keep a record of the formula so retouching can be easy to match... Keep out of the sun or cover your head with a dark cloth... YES A CHANGE OF HAIR STYLE — a CHANGE OF COLOR too — can literally have you "floating on air"...
