

BASIN BRIEFS

Mr. and Mrs. Fay Clark, Mount Hebron, had as their dinner guests last week, Mr. and Mrs. Ray Clark and family and Mr. and Mrs. Glidden Titus and family.

Mr. and Mrs. Don Schooler are general chairmen for the annual sweetheart ball to be given by Bonanza Parents and Patrons Club, March 5, in the school gym. Music will be by the "Smoothies" of Klamath Falls.

Mrs. Clara Goddard, Macdoel, and Vina Durham, Klamath Falls, returned recently from a 10-day trip to Salinas, where they visited Mrs. Goddard's husband, stationed at Fort Ord. Goddard has been transferred to Fort Benjamin Harrison, Indiana.

Mr. and Mrs. John Withers, Summer Lake, were in Klamath Falls overnight last Monday on a shopping trip.

Mrs. Ernest Hayden and daughters, Mary Lou and Lynette, of Callahan, returned last Sunday evening, having spent the weekend with her parents, Mr. and Mrs. Ed Gibbs, Paradise; Mrs. Lucille Wilkinson of Chico and Sergeant and Mrs. James R. Hayden of Camp Beale.

Les Elder, Summer Lake, took his brother, Wayne, to Lakeview several times last week for eye treatments.

Mrs. Ruth Patterson, San Francisco, was a guest of Mr. and Mrs. Fay Clark at Mount Hebron, last week.

Mr. and Mrs. Carl Craig and sons drove from their home at Shingletown recently to pick up Craig's sister, Thelma Owen, at Greenview. They went to Medford for a visit with their mother, Mrs. Virgie Craig, and Mrs. Craig's brother, Hugh Whipple. Returning from Oregon, the Craigs visited other relatives at Greenview.

Mr. and Mrs. Floyd Murray, Macdoel, were hosts to Mr. and Mrs. Bob Nunemaker, Canby last Friday afternoon.

Oda Eskildsen, Macdoel, was the guest last weekend of Kay Garey.

Alvin Weaver returned last Friday to Summer Lake from Merrill, where he had been a guest of his sister, Mrs. Jack Deboy. He has been undergoing medical treatment in Klamath Falls.

Mr. and Mrs. O. K. Johnston returned to New Pine Creek last Sunday from a three-day trip to California. They visited Mr. and Mrs. Walter Edwards at Greenview. Home McClain took care of their station during the day Friday and Saturday and Mr. and Mrs. Glenn Clifton, Lakeview, stayed evenings and Sunday.

Virginia Morehouse and LaDonna Bowen, Fort Rock, were guests of Mrs. Evan Carlon at Summer Lake last week.

Mr. and Mrs. R. J. Mansfield and family, Mount Shasta, were last Sunday dinner guests of Mrs. Bessie Filson, Mount Hebron.

Mr. and Mrs. Dan Roff and Elmer Jordan, all of Etna, made a business trip to Vacaville last Friday. En route home they visited in Redding with Mr. and Mrs. Lewis Burton and son, Lloyd, Mrs. Lillian Norton, Mrs. Virgil Nichols and Henry Carter at French Gulch.

Mrs. Ray Smith, Etna, has been visiting her son-in-law and daughter.

Mr. and Mrs. Bruce Mello, in Sacramento. She was accompanied south by her son, Stafford, and daughter, Rayeelyn, both students at the University of California at Berkeley.

Mr. and Mrs. Vernon Gilmore of Callahan attended the Lumberman's Conference in Redding last Saturday.

4-H NEWS

MIDLAND DAIRY CLUB
The Midland Dairy Club met at the home of Mrs. Calvin McNary. Mrs. Scala gave everyone judging sheets to study for the next meeting. Marlu Costel showed how to make a rope halter, and everyone made one.

The next meeting will be at Mrs. Ernie Milani's February 23. Refreshments were served by Mrs. McNary.

John Bair, News Reporter

HENLEY SHEEP CLUB

The regular meeting of the Henley Sheep Club, held at the Gross home, was called to order by President Steven Skinner. The first order of business was distribution of the programs for the year.

Mr. Gross told us we might hold our meetings in one of the buildings at the Experiment Station, and a vote was taken accepting that invitation.

Dr. Riker and Mr. Brandt gave a demonstration on docking and castrating lambs. We discussed lamb problems and the meeting was adjourned. Refreshments were served by Mrs. Gross.

The next meeting will be held at the Experiment Station, March 9. Mrs. Dingler and Mrs. Eckert to be co-hostesses. David Reppe, News Reporter

Argument Over Missiles Centers On Adequacy Of Administration Plans

By CHARLES CORDRY
WASHINGTON (UPI) — The great defense debate raging in Congress centers on the U.S. intercontinental ballistic missile (ICBM) program.

The issue is not over the quality of the American ICBM or the speed with which it was developed. The big argument concerns the adequacy of administration plans for producing the ICBM in greater quantity in view of Russia's evident all-out effort. What is an ICBM?

It is majestic, stainless steel vehicle, fabulously expensive, heavy as 100 automobiles, tall as a seven-story building, so agile it can leap 6,325 miles in a half hour and so accurate it can deliver a hydrogen bomb within about two miles of its aiming point.

It is taken for granted today. But as recently as 1955 when the U.S. ICBM program was in its early stages, the then Air Force Secretary Donald A. Quarles, himself a scientist, was saying if the missile could be perfected it would be an achievement of the ages.

From 1951 through 1953, the U.S. investment in ballistic missile development amounted only to about 440 million dollars. The B-36 super-bomber continued to be the chief long-range retaliation weapon. The B-36 took 40 minutes to go as far as the ICBM goes in one minute and more than 15 hours to do what an ICBM does in 30 minutes.

To develop the ICBM along with its sea-going and land-based brothers, the intermediate range ballistic missiles, and get them ready for combat units, the United States now has invested 10 billion dollars.

Under President Eisenhower's new budget, the investment in six ballistic missile programs will rise to \$13,500,000,000 by June, 1961.

No single research and development effort in U.S. history exceeds the ballistic missile program of the Air Force alone in scope, says the Air Force. And as a scientific achievement, it probably is outpaced only by the taming of nuclear energy.

Yet it has been made clear in the controversy now raging in Congress that in these most complex weapons in the history of warfare Russia is outproducing the United States.

Democrats and Republicans agree on that. Democrats say the United States could be in mortal peril over the next few years as a result. Republicans say that other weapons will offset the Russian missile superiority, and that there will be no gap in American power to deter war.

Russia leads in missile production for two reasons. It started developing ballistic missiles years ahead of this country. After the thermonuclear break-through in 1953-54 pointed the way to development of light weight warheads, the United States embarked on a hurry-up program to develop ballistic missiles. Military men believe this country no longer lags in quality. The lag in numbers is a matter of deliberate choice, the administration preferring to await development of an advanced ICBM, the Minuteman, before producing vast numbers.

The U.S. ballistic missile program: —The Atlas ICBM. The first U.S. intercontinental ballistic missile. Now operational in the hands of troops at Vandenberg Air Force

Base, Calif. A second squadron will become operational at Warren Air Force Base, Cheyenne, Wyo., this spring. Thirteen squadrons are planned over the next two years.

—Titan ICBM. A liquid-fueled missile like the Atlas but said by the Air Force to have greater range and payload. Fourteen squadrons are planned. It is about a year behind the Atlas in development. The only American ballistic missile ever to perform perfectly on its first flight test. It has had four successful flights and three failures none of which was related to the missile itself but rather was connected with test devices.

—Minuteman ICBM. A rapid-firing, solid-fueled, three stage rocket. Due to enter service in 1963 and to be installed in both underground launching sites and

on special Strategic Air Command railroad trains. Test flights should start this year.

—Polaris. A two-stage, solid-fueled missile to be carried aboard nuclear submarines and described by President Eisenhower as "impossible to destroy by surprise attack." With a range of 1,200 miles, the Polaris is due to go to sea aboard the submarine George Washington late this year. Twelve such submarines are currently planned. In its last five test firings, from Cape Canaveral, Fla., Polaris has hit the bulls eye.

REDECORATED Office Space 545 Month - Inquire DREWS' Manstore Phone TU 4-4121

—Thor and Jupiter. Intermediate (1,500-mile) range ballistic missile. Not being employed by U.S. forces. Four Thor squadrons 15 missiles each turned over to British Royal Air Force and in operation. Two Jupiter squadrons earmarked for Italy and one for Turkey.

Husbands! Wives! Get Pep, Vim, Feel Younger

Thousands of couples are weak, worn-out, exhausted because body lacks iron and Vitamin B1. For a younger feeling after 40, try new, improved Oxy-Tonic Tablets. Contains iron and high-potency dose Vitamin B1 for quick, new, younger pep, vim, 3-day "get-acquainted" size only 99¢. Or get Economy size, save \$1.67. All druggists.
