

Four Addresses Scheduled In Holy Land By Graham

JERUSALEM (AP) — Billy Graham will preach four times in Israel this weekend, but residents of the Jewish nation's biggest city may have to go next door to hear him.

Graham, now visiting neighboring Jordan and the holy places there, is scheduled to preach at a

church in Haifa Saturday night, at an open air meeting in Nazareth Sunday morning, at the YMCA in the Israeli sector of Jerusalem Sunday night and on Monday at St. Peter's church in Jaffa.

Jaffa is the partly Arab, partly Jewish twin city of Tel Aviv, Israel's largest city and chief port. A spokesman for the Christian Church Council in Israel, which is organizing Graham's meetings, said originally the U.S. evangelist was to have spoken in Tel Aviv, in the 3,000-seat Frederik R. Mann Auditorium or in the auditorium of the Zionist Organization of America.

Managers of the two halls, the spokesman said, first consented to make them available, then withdrew their offers. No reasons were given.

An Israeli government official said the possibility of the Mann Auditorium — the city's cultural center — or some such hall in Tel Aviv being made available to Graham is still under consideration.

He said Graham's appearance involved Jewish religious feelings. "There is of course no objection to Graham preaching in churches," the official said.

Despite a 4:30 a.m. departure from Cairo, Graham put in a full day Monday visiting holy places on the Jordan side of the border dividing the Holy Land. He knelt briefly at the silver star marking the spot in Bethlehem where legend says Christ was born, visited Gethsemane and drove to the tombs of the family of Abraham at Hebron.

Lad Admits Murder

VICTORVILLE, Calif. (AP)—A 17-year-old boy has admitted he killed the mother of one of his friends with an iron rod, authorities say, because he was jealous of her family's prosperity.

A homicide officer said young David Marz of nearby Apple Valley will be booked as an adult for investigation of murder in the death of Gladys Hodge, 47. She was beaten Friday night and died Sunday.

Sheriff's Lt. Barton A. Keene said David was a school chum of one of Mrs. Hodge's sons and often used the swimming pool at the Hodge home. David is the son of a cleaning plant employee.

Keene said David expressed envy because the Hodge had many things his family couldn't afford.

Chile in South America is rich in nitrates, iodine and copper.

U.S.-Red Missile Gap May Never Come To Pass

By RAY CROMLEY

WASHINGTON (NEA)—Jumping in now to close the possible missile gap of 1962-64 would seriously endanger the security of the United States.

Likewise, if the Russians built all the 1960-type ballistic missiles in 1960-63 that U.S. estimators think they're capable of, Nikita Khrushchev would be endangering his own defense position.

This is the startling private thinking of some of the top U.S. defense men. It is the reason why current U.S. missile production will be relatively small in 1960-62, until new type missiles are ready.

This is the reason why there are some men in the Pentagon who now think that a real missile gap may never develop.

TO UNDERSTAND this reasoning we have to go back a few years.

Take the air war in Korea. The Russians had concentrated on jets. The U.S. was far behind. The Red MIG was so good that they mass produced it. There was a "plane gap."

The Russians had a lot of these modern planes. The U.S. didn't. But by leapfrogging the MIG-15 type plane the U.S. produced smaller numbers of a better plane, and the air battle in Korea was lopsided in our favor.

U.S. military men believe this lesson was not lost on the Russians.

Again look back several years. There was great furor in the U.S. that Russians were producing a huge intercontinental bomber fleet. The men who now forecast a missile gap were forecasting a bomber gap with thousands of superior Russian bombers ready in a few years.

The U.S. tried to meet that gap, and built a large number of intercontinental bombers, hurried continental defenses at great expense.

BUT THE RUSSIAN threat never developed. The Reds decided to leapfrog into missiles. The U.S. ended up with a considerable supply of intercontinental bombers which quickly were obsolete.

In top U.S. military circles this Russian bomber red herring is now regarded as one of the major Russian victories—wasting U.S. production and effort in a blind alley.

Now these defense planners see the same pattern developing. They see Khrushchev speaking loudly about how many missiles he is producing.

But while Mr. K. talks, they notice two things:

1. He is improving his conventional army, navy and air force in quality. He is producing more conventional weapons, not fewer.

2. He is not—so far at least—stepping up his missile production sharply. Nor is there evidence that he is planning to do so.

If Khrushchev were going to produce a great quantity of 1960-type missiles, he'd have to already have started a vast program of missile bases. So far there has been no evidence of this.

BUT WHAT? Khrushchev

does, U.S. planners think they've learned the lesson of the Korean air battle and intercontinental bomber race.

So, U.S. strategists want to leapfrog today's old-fashioned intercontinental ballistic missiles. They want to turn out only as many liquid-fueled Atlases and Titans as they have to get by.

For these missiles with their fixed and well-advertised locations will soon be sitting ducks for Red sneak attacks. They're cumbersome and expensive. They're not versatile. They tie the U.S. to a vast network of expensive soon-to-be-obsolete type of missile bases.

If turned out in large quantities, they would tie up a great portion of U.S. military effort and organization on weapons and bases capable of doing only one job in one way.

The strategists instead aim at jumping right to a new generation of superior ballistic missiles—the solid-fueled Sky Bolt, Minuteman and the advanced Polaris.

These are highly mobile. They get away from the fixed Maginot-line type of defense. The 5,000-mile-plus Minuteman can be put on railway cars. The 1,500-mile Polaris fits on subs. The 1,000-mile Sky Bolt will nest neatly on B-52s and B-58s.

These new missiles can't be zeroed in by Soviet intelligence men and knocked out on the first lick. They are relatively cheap and can be produced quickly in large numbers. They can do a variety of jobs.

As one defense man puts it: "If we concentrated on the Atlas and Titan closing the gap now, we'd be condemning ourselves to certain inferiority later. This we can't afford."

"It's not just expense. Once you get a big program like that in motion—bases, men, weapons, electronics—it's hard to turn the juggernaut around. And you find yourself committed to a defense that just isn't quite good enough."

Union Chief, Jimmy Hoffa, Raps Enemies

NEW YORK (AP) — Teamsters Union President James R. Hoffa hurled criticism at most of his adversaries Monday night at a Madison Square Garden rally.

An estimated 8,000 cheering Teamsters and members of their families had filled the garden.

Hoffa called it "a wonderful turnout," considering that most Teamsters "worked all day."

The Teamsters president had angry words for recent labor legislation, Sen. John F. Kennedy (D-Mass.), his brother, "little Bobby Kennedy," AFL-CIO President George Meany, Auto Workers President Walter Reuther, the press, radio, and television.

Sen. Kennedy, who helped write the new labor law, was a member of the Senate committee which investigated union and management rackets. His brother, Robert F. Kennedy, was chief counsel of the committee.

His audience enthusiastically whistled and cheered as Hoffa turned to reporters covering the rally and said: "There is no use talking to reporters. Distortion is what you can expect from the press. Editors are controlled by big business."

Hoffa gave a point-by-point analysis of the new Landrum-Griffin labor reform law, seeking to convince his audience that it was designed to destroy the Teamsters and turn them into strikebreakers.

He said he plans to build a web of union alliances covering millions of workers as an answer to the law. He would have all unions arrange common expiration dates for their contracts. Thus, he said, unions could circumvent the law's ban on secondary boycotts.

The Teamsters—there are 150,000 of them in the metropolitan district—had made special pleas to the city's unorganized cab drivers to park their vehicles and come to hear Hoffa. There was no indication the cab drivers responded in any great numbers.

At a news conference after his speech, Hoffa denied printed reports that he has a purge list and is actively opposing Sen. Kennedy's candidacy for the Democratic presidential nomination as well as reelection of congressmen who are supporting Kennedy.

PRIVATE Jerry R. Chapman, son of Mr. and Mrs. Rex Chapman, Route 1, Box 443, is stationed at Ft. Devens, Massachusetts, Co. E, USASAT. Chapman enlisted with the Army Security Agency in November, 1959 and took basic training at Fort Ord before his transfer to Fort Devens.

ORDER OXYGEN JACKSON, Miss. (UPI) — The Mississippi Legislature adopted a resolution Monday authorizing the State Health Department to install emergency supplies of oxygen in the legislative chambers. Rep. Henry McKnight said many legislators suffer from heart ailments and "I'm afraid there may be some more before this session is over."

Rioting Erupts In Congo Area

ELISABETHVILLE, Belgian Congo (UPI)—Bloody rioting broke out in this provincial capital over the weekend and authorities today imposed martial law.

First reports said 18 persons were killed, 150 seriously injured and dozens suffered minor wounds.

The rival Conakat and Balubakat political parties — the two main groups contesting the general elections in May — battled each other with spears, poison arrows and home made shotguns.
