

# Peaceful Demonstration Scheduled By Negroes

LAS VEGAS, Nev. (UPI) — About 300 Negroes mapped plans today for a peaceful city-wide protest demonstration against segregation at some of the nation's most widely known glamor spots.

The demonstrations — "sit-ins" — are scheduled for Saturday night to protest what the National Association for the Advancement of Colored People calls "the fifth worst Jim Crow area in the nation."

The protest will be along the

famed Las Vegas Strip — at hotels like the Sands, Riviera, Sahara, Stardust, Desert Inn, El Rancho Vegas — at downtown clubs and theaters throughout the city.

"We don't want to break any laws," said Dr. James B. McMillan, a dentist and NAACP member. "If we find we can picket outside these places, we will."

"If that's not legal, we simply will go into the bars, casinos, restaurants and theaters and sit down. If we're not served, we'll stay two hours — maybe longer. That's a sit-in."

The police expect little — if any — trouble because of the protests. Many of the larger hotels are expected to ignore them, if at all possible.

McMillan said the protests were precipitated by the wave of lunch counter demonstrations that began in the South and rapidly spread to some northern areas.

"We believe the climate is right now for demonstrations," he said. "People are interested in the problem, and many are sympathetic to our stand. Yes, this is the right time, people are growing more aware of the injustice all the time."

McMillan said he would rather not have to hold the protests, but that hotel owners and businessmen refused to consider his method of solving the issue.

"I think the ideal way to iron this out," he explained, "is by sitting down with the owners and businessmen and talking this thing out intelligently. So far they have refused to do this."

Las Vegas Mayor Oran Gragson, cancelled a public meeting he had originally scheduled for tonight to discuss integration in this gambling center. There are about 8,000 Negroes in the southern Nevada area.

He said pressures caused him to reconsider.

McMillan said the fact that Negro entertainers often perform in the casinos and lounges forbidden to the citizens of Las Vegas had nothing to do with the decision to protest.

"They're having to fight their own battles," he said. "All except the very top ones. Others can't eat in certain places, have to leave the casinos and have almost as much trouble as we do."

# Mate Catches Falling Trapezer

DAYTON, Ohio (UPI) — Every eye followed "Tajana, the Indian Goddess" as she soared to the top of the building, then a slip, and she was plunging to earth before the horror-stricken crowd.

But instead of crumpling in a heap, the 26-year-old trapeze artist fell into the arms of her husband waiting below and the audience at the opening show of the Shrine circus here Thursday drew a sigh of relief.

"I would have landed on my back on the hard floor but my husband caught me and just one foot went under," Tajana, whose real name is Struppi Hannelord of Osprey, Fla., said.

She was taken to a hospital with a lacerated right foot, and her condition was listed as "satisfactory."

"I was swinging real high," she explained. "I went back too far and I was whipped backward. I didn't think as I was falling, but I'm pretty lucky. The building here is not so high (about 50 feet). I am usually in one 40 or 50 feet high."

Her husband, Tom Hannelord, 31, circus announcer and emcee, said he was standing beneath her, a little farther back than usual when she began to fall.

"I don't know how I happened to be in that position. It was just one of those things," he said.

He said his wife has been working on the trapeze since she was 8 years old and he has never seen her fall before.

"She will be back in the act before the circus leaves Dayton," he said.

# PANTS DELAY WEDDING

MARSKE, England (UPI) — Christopher Clarke, 27, kept his bride waiting at the altar for 30 minutes Thursday while he dashed 20 miles to get a new pair of pants.

Clarke discovered while dressing for the wedding that the pair of new pants he ordered were four sizes too small.

# Approach To Disarm Rebuked By Soviet Union

GENEVA (AP) — The United States asked the Communist bloc today to begin negotiations on details of a central agency to enforce a worldwide disarmament agreement. The Soviet Union rejected this approach.

American Ambassador Frederick M. Eaton told the 10-nation disarmament conference that East and West agreed to the general idea of having a central enforcement body. He suggested the conference could begin the task of defining the organization and functions of such a body at its next meeting, Monday.

Soviet Deputy Foreign Minister Valerian Zorin maintained Eaton's proposal attacked the problem of disarmament the wrong way around. First, he said, let us discuss specific arms cuts and then get into control details.

French disarmament expert Jules Moch told Zorin the Western powers would resist the Soviet approach. In this conference as in others in the past, Moch said, there seemed to be an effort on the Soviet side to whittle down the principle of controls.

"We will not be led down lanes where disarmament is dissociated from controls," Moch said.

Speaking in support of Eaton's position, Canadian Gen. E. L. M. Burns drew on his own personal experiences as former head of the United Nations Emergency Force in the Middle East to underline the complexity of the control problem.

Determining how many men a country has under arms can be a difficult thing, he said, if the troops in question keep changing back and forth from uniforms to civilian clothes.

In the disarmament plan submitted by the Western side—the United States, Britain, France, Italy and Canada—an international organization would be established as the central enforcement agency.

The rival Soviet plan also spoke of the need for central control machinery. Zorin maintained it would be pointless to agree on details of control machinery until the nations knew how much of their military strength was to be

demobilized. He suggested that if the cuts were large the control arrangements would necessarily be more complex than if only small reductions were agreed upon.
