

OTI Student Undergoes Surgery After Accident

A 20-year-old OTI student, Bart Fermoyle, underwent more than an hour of surgery at Klamath Valley Hospital Friday afternoon after receiving severe head lacerations in a two-car crash north of Chiloquin.

The accident occurred at the Kirk Junction on Highway 97, 13 miles north of Chiloquin. State police officers said Owsley's car struck one driven by Ralph Allen Greenleaf, 61, Everett, Wash. Both vehicles were northbound.

The police report said that Greenleaf was making a right turn to Kirk. Owsley's car skidded on the rain-slicked pavement, struck the Greenleaf car and slid across the road and tumbled into the ditch.

There was speculation that the impact of the crash may have caused Owsley's head to pitch forward into the windshield. Neither Greenleaf nor his wife, who was a passenger, were injured.

Investigation is continuing.

KF Man Wins Recognition In Prop Wash

A Klamath Falls man won recognition in a recent issue of Prop Wash printed at the Naval Air Station, Whidbey Island, Oak Harbor, Wash.

He is John Fabianek, AQ2-P1, 22, son of Mr. and Mrs. John Fabianek, 4944 Homedale Road.

The article credits him with graduation from recruit training at NTC San Diego in late 1957 with highest academic rating in his class when he was also named outstanding recruit in his company.

He graduated seventh in a class of more than 100 at Norman, Okla., and was first in his class when he completed training at Memphis, Tenn.

Fabianek is presently serving as scoutmaster for a scout troop that has made distinguished marks and has been recommended for the Navy Enlisted Scientific Education Program.

Has Operation

ROME (UPI) — U.S. Ambassador James D. Zellerbach today left a Rome clinic where he underwent an operation for appendicitis Oct. 28. He will convalesce at his residence, the Villa Taverna.

SPEECH CLASS is a sophomore speech requirement for half a year. It is felt by administrators and educators that speech is a necessary tool for all students. Here, Diane Bailey explains a point in demonstration speech. Advanced speech is also offered.

THE SNACK BAR proves to be a very popular place in the KUHS cafeteria. Here, some students are shown as they move through the line at the bar. Students numbering 600 to 700 go through the snack bar each day.

THE OWL HOOTS

By A. L. GEISS

A brief history of Oregon Technical Institute may be of interest to newcomers in the Klamath Basin and others who enjoy thinking back over the period since its inception.

Oregon Tech evolved from a vocational trade school to a unique status in Oregon's System of Higher Education during the first 13 years of its existence. It began operating as Oregon Vocational School in 1947 with 31 students, almost all of whom were veterans. In December of 1948, the name was changed to Oregon Technical Institute. By 1955, its attendance had passed the 1,000 mark. Of these, 75 per cent were non-veteran, recent high school graduates.

During the first 13 years, the responsibility for direction and control was vested in the State Board of Education. On July 1, 1960, the institute was transferred into the State System of Higher Education.

During the years 1945 and 1946, war veterans were being discharged from foreign duty and returning home. Their demands for vocational rehabilitation training were greater than the ability of Oregon's post-high school educational institutions to offer such services. It was in this setting that the state legislature took certain action preliminary to establishing Oregon Technical Institute.

In early 1946, the facilities of the Marine Recuperalional Barracks at Klamath Falls became available from the federal government. After investigating the feasibility of its use for educational purposes, the State Emergency Board in October 1946 granted \$75,000 to the State Board of Education for the purpose of converting the barracks facilities for use as a state vocational school.

More than 80 buildings which were readily converted into classrooms, laboratories, and housing facilities. A gymnasium, bowling alley, and swimming pool were complementary attributes to the campus setting.

The first classes were opened on July 14, 1947, with 31 students enrolled in three courses: auto body and fender, auto mechanics and cooking. By April 1, 1948, less than 10 months later, more than 500 students in daily attendance were enrolled in 30 different courses.

Oregon Technical Institute developed during a period characterized by change. The economy of Oregon changed from primarily agricultural to basically industrial. The transfer of the institute into the System of Higher Education was the eventual result of considered study of its proper place in serving both the needs of Oregon's high school graduates and the manpower needs of Oregon's businesses and industries.

The Engineering Department has received and is using in a training program a theodolite, a

\$1,700 instrument that is used for making precise horizontal and vertical measurements. This piece of equipment is used in U.S. Geological and U.S. Coast and Geodetic surveys in making precision measurements.

Fred Foulon reports that Joe Sanders, a 1959 surveying graduate, visited his department last week. Sanders works for Dean, Stewart, Stinchfield, Hall and Sliver, general engineers and land surveyors of Sacramento. He is chief of one of the company's 20 crews and is considered one of the best curb and gutter men that they have in their employ.

Dr. Dan Fullmer and Dr. Howard Akers of the General Extension Division of the State System of Higher Education were on our campus last Monday to discuss which OTI courses should be offered in the extension centers of the state. It will be Oregon Tech's responsibility as a member of the State System of Higher Education to make its courses available to the people of Oregon through extension courses. Oregon Tech's technical institute type training will serve the industrial and business areas of Oregon with a type of training which has not previously been available to them.

Four students were dismissed from Oregon Tech a week ago for drinking on the campus. This might seem like harsh treatment considering the age in which we live. Dr. Purvine made a speech at the student assembly last Tuesday which was very well received in which he stated that it is not good when students who need the type of training that we offer at Oregon Technical Institute are kept home by their parents by adverse stories about our campus life.

"The legislature has passed laws," he stated, "that require students as well as other persons to participate in no activities that cause problems for other persons. There is no reason," he stated further, "why OTI should lose good students because parents hesitate to send their children here."

We believe that Oregon Tech has this year one of the finest student bodies to date, and we think that the reception of Dr. Purvine's speech bears out that fact.

R. L. Smith, dean of students, will make high school visitations next week at Cottage Grove, Marshfield, Myrtle Point, Coquille, North Bend, Reedsport, Newport and Toledo. Frank Ninko, dean of men, will visit schools at Scio, Jefferson, Fall City, Valseiz, Sherwood, Yamhill, Carlton, Sheridan, Willamina, Clatskanie, Nestucca and Taft. Northern California schools are going to be visited by representatives from Oregon Tech, Chico State, College of the Siskiyous, University of California and Arm-

Artists Invited To Show Work

All artists living in the area of Roseburg, south to Mount Shasta and from the coast to Klamath Falls are invited to submit their work for exhibition in the first annual area exhibition to be sponsored by the Rogue Valley Art Association.

The exhibit committee announced Dec. 6 through Dec. 23 as dates for the competition. The show will be held in the Rogue Gallery, 220 West Main Street, Medford.

The juried exhibit, which will include all media, offers nominal cash awards. The three panel jury will be selected from the Oregon Art Alliance in convention in Medford this month. The alliance, composed of gallery, museum and art association heads throughout Oregon will announce the committee of selection in the near future.

Final date for submitting work is Nov. 17.

For information contact Mrs. Margaret Knoll, 2323 White Avenue, this city, telephone TU 2-3292, or Jack Teeters, chairman, First Annual Area Competition 1960, 2198 Crestbrook Road, Medford.

Mothers-In-Law Not All Terrible

By ANN LANDERS

Dear Ann Landers: You seem to have an awful lot to say against mothers-in-law. You probably drew a pill. I hope you'll print the other side.

My son married an empty headed little who doesn't know anything about keeping house, cooking or rearing children. When an appliance breaks it just sits there. Her vacuum cleaner isn't working, her toaster cord is frayed and she has borrowed my iron every Tuesday for three months.

Her whole house looks like Fiber McGee's closet. I've seen her kids with the same jam on their faces for two days straight. When I try to tell her how to do things she runs to my son and says, "I'm 'butting in.' Am I?—OTHER SIDE"

Dear Other: Well, yes. However well-intentioned the criticism, it's unwelcome — and this constitutes butting in.

Of course it's difficult for a mother to sit by and watch all this, but under the circumstances, the best thing you can do is to leave her alone.

(P.S. I hate to spoil your theory, but my own mother-in-law is a gem. Twenty-one years and not a single "suggestion.")

braces are expensive, and so are groceries and I can name a long list of other things. But what did he think marriage with a ready-made family was going to be like?

(P.S. It's no cheaper when you make your own!)

No woman should have to account for every penny and beg for a few dollars to spend as she chooses. This is a matter of personal dignity. Tell the guy he has a lot to be thankful for and to quit bellyaching!

Dear Ann: My boy friend gave me a bracelet for my birthday. He said it was gold. My wrist turns green every time I wear that bracelet. My girl friend says good jewelry doesn't turn the skin green, and that my boy friend gave me a cheap present. True or false?—MARIETTA

Dear Marietta: False. Your body chemistry may well be to blame. Some people, because of an abundance of certain acids in the system, get green marks from a variety of metals which touch the skin.

Dear Ann Landers: I have to write this letter or flip my lid. I boiled over when I read the attacks on you by lazy women who don't want to pick up after their husbands. May I have a few inches of newspaper space to say something in behalf of those of us who think you are right — that picking up after a husband is part of being a decent wife.

I've known women who knock themselves out for organizations. They run to meetings, spend hours on the telephone, bake like crazy for church bazaars and haul tons of rummage in their cars. But when it comes to doing something extra for their own family, they scream like wounded elk.

A woman's basic satisfactions should come from her home. If these dames don't think so, why did they marry? — A REAL WIFE

Are you going steady? Making marriage plans? If so, send for Ann Landers' booklet, "Before You Marry—Is It Love Or Sex?" enclosing with your request 20 cents in coin and a large, self-addressed, stamped envelope.

Ann Landers will be glad to help you with your problems. Send them to her in care of this newspaper enclosing a stamped, self-addressed envelope.
