

# Air Raid Warning System Study Draws Sharp House Blast

WASHINGTON (UPI) — House investigators have charged that national air raid warning system administration officials tried to suppress a report criticizing the embarrassing, "These are dangerous games because they feared it might be for politicians to be playing," said

Chairman John E. Moss of the House government information subcommittee.

"To suppress public information because someone might be embarrassed" is a threat to the fabric of democratic self government," he said.

Moss cited an Aug. 2 letter from Leo A. Hoegh, director of the Office of Civil and Defense Mobilization (OCDM), in support of his charge.

Hoegh's letter, addressed to Lt. Gen. A. G. Trudeau, head of Army research, said, "it would be most unfortunate" if a presentation of the report resulted "in embarrassment to the Army, to the Department of Defense or the OCDM."

Moss said in a statement Tuesday, "Political face-saving has been claimed by an administration bureaucrat as justification for suppressing the ugly fact that during the last eight years little or nothing has been done to put into effect a meaningful air raid warning system."

Earlier this month, Hoegh denied that he had tried to suppress the still secret report, prepared under contract for the Army by the Operation Research Office of Johns Hopkins University.

Army officials have said the report would not be made public until they had an opportunity to review it.

## Attack Would Be Fatal, General Tells Soviets

GROTON, Conn. (UPI)—Soviet Russia and Communist China were warned today that they would be inviting their own destruction if they attempted a surprise attack upon this country.

The warning came from Gen. Lyman L. Lemnitzer, chairman of the Joint Chiefs of Staff, at the launching of the mammoth Polaris missile-firing nuclear submarine Ethan Allen, whose 16 therm-nuclear rockets have a target range of 1,500 miles.

Lemnitzer, speaker at the christening at the Electric Boat Yards of General Dynamics Corp., said "The Communist leaders have respect for only one thing—military power."

"Our enemy must know at all times that we maintain the certain ability to destroy him no matter how, or with what attempt to achieve surprise, he might seek to attack us. We have that capability now," he said.

Lemnitzer declared that "the Ethan Allen and the long line of fleet ballistic submarines which follow it—taken as a part of our over-all invulnerable retaliatory forces—give unmistakable evidence to the world that we intend to maintain and enhance that capability in the future."

Earlier class Polaris submarines, including two now operational, have 1,200-mile missiles.
