

Oregon Girl Is Scholarship Winner

CHICAGO (AP)—An Oregon girl, Lebanon, she won her award for today was named the winner of her work in entomology. a \$400 college scholarship, the Philip Krouse, 18, Grants Pass, second Oregon 4-H Club member was named Sunday as the winner of a \$400 agricultural project award at the national 4-H Congress. She is Fay Udell, 17, of route 3, Both of the Oregon winners have been in 4-H work nine years. Miss Udell is an expert on insects and plans to make entomology her life work. She said her father, Bert, a forest engineer, has given her invaluable help with her insect collection.

Krouse has 82 registered sheep and 26 cattle on the 276-acre farm of his parents, Mr. and Mrs. Francis A. Krouse. He also has played a leading role in fund-raising programs for the 4-H Club. Last year he was wagonmaster on the 225-mile trip 4-H Club members made in live covered wagons from Jackson in the county to the 4-H summer school at Corvallis. He also was a delegate to the national 4-H Club conference in Washington, D. C., last April.

WHAT DOCTORS SAY ABOUT:

T. B. From Telephones

- Periodic Heaviness
- Clotting
- Ovary Removal

Q. What is the risk of infection with T. B. from telephones?

A. Tuberculosis germs are projected when infected persons cough or sneeze. If they cough or sneeze directly into the mouthpiece there would be some danger of another user picking up the germs. This danger might be reduced by removing the mouthpiece and washing it with soap and hot water. It should then be swabbed with an antiseptic solution. It might be simpler to cover the mouthpiece with a piece of facial tissue, which may be discarded after use.

Six Killed In Oregon

By THE ASSOCIATED PRESS
Highway travel took six lives on the long Thanksgiving holiday in Oregon.
Two were killed Thanksgiving Day, four others Saturday.
The Thanksgiving Day crash took the lives of William Nickell and Mildred Jones near the Southern Oregon town of Jacksonville. The Saturday crashes killed Mr. and Mrs. A. L. Puley of Notus, Idaho, on a highway east of Bend; Michael John Helligso, 16, Astoria, near Astoria; and Anthony Bass, 56, Aptos, Calif., on the highway near the Eastern Oregon town of Jordan Valley.
Four persons died on Oregon highways last Thanksgiving. The toll for November in Oregon now is up to 49, and the Associated Press count for the year is up to 425, compared to 434 at this time last year.

Hanford Plant Capable Of Producing Electricity

WASHINGTON (AP)—An engineers' report says large-scale production of electricity as a by-product of the government's plutonium reactor at Hanford, Wash., is probably economically feasible.
The Senate-Atomic Energy Committee, for which the report was written by engineering consultants and made partly public, has not yet studied the document.
"Accordingly," the committee said, "the data and conclusions are not necessarily those of the committee."
A \$100 million electricity-producing project has been proposed for Hanford, as an addition to a \$145 million plant now under construction, to develop as much as 700,000 kilowatts of electric power. The main plant has been designed to permit later installation of the electricity-generating facilities.
Robert W. Beck, Herbert C. Westfall and William C. Trommershausen of the firm of R. W. Beck and Associates, Seattle utility analysts and engineers, wrote the two-volume report.
The Senate-Atomic Energy Committee made only one volume public. It said the other contains secret production data on plutonium, which is used in nuclear weapons.
The engineers were employed, a spokesman said, to review previous material and "determine whether the basis for the inclusion of the power-generating facilities in the reactor are still economically and technically sound."
The report appeared to give an answer a qualified "yes." It noted that an important factor is how long the need for plutonium production continues.
In a 1958 report, the Atomic Energy Commission concluded the production of 700,000 kilowatts of power at Hanford would be profitable and "will produce plutonium at a significant lower cost than a plutonium-only concept."
The Beck report said an additional 400,000 kilowatts of power will be needed in the Pacific Northwest by 1964. It demanded that after that the demand will outstrip the supply, unless more power is generated.
The engineers also said that in reaching their conclusions on the cost of producing electricity at Hanford no allowance was made for items to which a private enterprise would be subject, such as money outlays, interest on capital investment and insurance and taxes.

Paper Company President Dies

LEWISTON, Idaho (AP)—Robert E. Bundy, 55, president of Potlatch Forests Inc., who started as a news print mill laborer, died of a heart attack Saturday night.
He came to Potlatch Forests, which has plants or subsidiaries at 15 places around the nation but whose headquarters is here, about 2½ years ago from San Francisco, where he was executive vice president of Fiberboard Paper Products Inc.
Under Bundy, PFI expanded, acquiring Bradley and Woods lumber companies in Arkansas, and promoted such paper products as curtains, plates and milk containers.
His widow, Margaret, survives, as do a son and daughter. Memorial services are planned here Tuesday.

DEBBIE ENDS HONEYMOON

HOLLYWOOD (UPI)—Actress Debbie Reynolds, 28, and shoe tycoon Harry Karl, 46, ended their brief honeymoon as the actress could report to work today on the movie "The Pleasure of His Company."
The couple, married in a surprise ceremony Friday night, hid away for the two-day honeymoon. They said they would take a prolonged honeymoon after filming of the movie is completed.

'Repentant' New Deal Planner Dies Suddenly

CHARLOTTESVILLE, Va. (AP)—Donald B. Richberg, 79, who helped plan the Democrats' New Deal in the 1930s but became a self-described "repentant politician" in his old age, died unexpectedly Sunday.
The lawyer and author had complained of feeling ill in the morning. Shortly afterward he was found dead by his wife.
A funeral service will be held at 11 a. m. Tuesday at St. Paul's church in the nearby village of Ivy. Burial will be Wednesday in Ft. Lincoln Cemetery, Washington.
Richberg helped write the Railway Labor Act that passed Congress in 1926, but his chief fame stemmed from his part in shaping President Franklin D. Roosevelt's New Deal in the depression years.
He was co-author of the National Industrial Recovery Act in 1932 and later became general counsel and board chairman of the National Recovery Administration.
When the NRA was declared unconstitutional by the Supreme Court in 1935, Richberg, who had been a Chicago lawyer earlier in his career, returned to the practice of law in Washington.
He was appointed special assistant to the attorney general in 1936 and from 1938 to 1940 was chairman of the committee on commerce of the American Bar Association.
Richberg moved from Washington to Charlottesville in 1948. He was semi-retired, he was a lecturer at the University of Virginia Law School from 1949 to 1952. He was the author of numerous books.

Here's Where Santa Gets Christmas Money

Figure up just what the Santa in your family needs and then visit Suburban. Look at these typical loan examples:

Loan	Mo.	Pay
\$100	12	\$10.05
\$200	12	\$20.09
\$300	12	\$20.16
