

Annual ASC Meeting December 19; Committee Members To Be Picked

The annual ASC convention for Klamath County will be held Monday, Dec. 19, at the ASC Office, County Agricultural Stabilization and Conservation Committee Chairman Earl Wilson announced.

The chief purpose of the meeting will be to elect the members of the ASC County Committee, who during the coming year will direct the various U.S. Department of Agriculture programs administered by the agency.

Committee members will be elected by convention delegates chosen earlier by mail in various communities of the county. The elected chairman of each community ASC Committee is the community's delegate to the county convention, with other members as alternates.

The convention delegates will elect committee members for a one-year term. The person receiving the highest number of votes will be county chairman, followed in order by the vice chairman, third member, and first and second alternates.

The committees elected must be bona fide farmers who are taking part in one or more of the programs administered by the county ASC office, which includes price support, acreage allotments and marketing quotas, the wool and sugar programs, farm storage facility loans, the Agricultural Conservation Program and the Conservation Reserve. While the

Lawsuit Seeks Vacation Pay For Discharged Man

Two large lawsuits were filed this week in the county clerk's office.

Michael E. Salo, a representative of the Lumber and Sawmill Workers Local Union No. 2922, is suing a now defunct Klamath Falls lumber mill for \$123,503.06 on behalf of 164 ex-employees of the company.

The complaint alleges that the employees were working for the mill, doing business as Kalpine Plywood Mills, prior to March, 1957. Under a contract the company had with the union, the employees were entitled to paid vacations. It is alleged that the employees were discharged in March and the vacation time was not paid.

Salo is asking \$23,026.66 in vacation pay, another \$90,476.40 as

a penalty for non-payment of the wages and \$10,000 for attorneys' fees.

The second suit was filed by Mr. and Mrs. Bernie G. Rawlins, 72 Pine Street, against Carsten C. Nelson, a building contractor.

The Rawlins claim that Nelson used a giant metal "medicine ball" while constructing the Pony Pass Motel, 75 Main Street, between January 1953 and November 1954. The force of the ball hitting the ground caused the walls of their house to crack and damaged some plaster, the complaint alleges. The Rawlins also complained that Nelson dug away earth which was providing support for their house.

The suit asks \$10,000 for damage to the house, \$7,500 as the cost of a retaining wall,

Extension Courses Set

The General Extension Division of the state System of Higher Education has announced evening courses to be offered during the winter term beginning early in January.

The courses are as follows: AA 293, elementary sculpture, Tuesdays, beginning Jan. 3, from 7 to 9:45 p.m., at Klamath Union High School. The course yields two hours of college credit.

Art Ed. 311, arts and crafts for the elementary teacher, Mondays, beginning Jan. 9, from 7 to 9:45 p.m., at KUHS, three hours credit.

Ed 407, seminar: Adlerian theory (G), Wednesdays, beginning Jan. 4, from 7 to 9:45 p.m., at KUHS, three hours credit.

Ed 472, principles and practices in curriculum constructions, Fridays, beginning Jan. 13, from 7 to 9:45 p.m., at KUHS, three hours credit.

Ed 483, the maladjusted child (G), Mondays, beginning Jan. 9, from 7 to 9:45 p.m., at KUHS, three hours credit.

Ed 485, principles and practices of guidance services (G), Tuesdays, beginning Jan. 3, from 7 to 9:45 p.m., at KUHS, three hours credit.

Hst 302, History of the United States, Fridays and Saturdays, alternate weeks, beginning Jan. 13, from 7 to 9:45 p.m., at KUHS, three hours credit.

Sc 202, foundations of physical science, Thursdays, beginning Jan. 5, from 7 to 9:45 p.m., at KUHS, three hours credit.

Wr 112, English composition, Fridays, beginning Jan. 6, from 7 to 9:45 p.m., at KUHS, three hours credit.

RULES METHOD ILLEGAL
NEW YORK (UPI) — Federal Judge Archie O. Dawson ruled Friday that the "black book" method of selling movies to TV was a violation of the anti-trust laws.

Block booking is the sale or distribution of one special or feature movie only on condition that the purchaser also buys several others which he may not want.

Gov. Hatfield Defends Record

SALEM (AP) — Gov. Mark O. Hatfield Thursday defended his extensive out-of-state travels.

Hatfield said he has spent 145 days outside Oregon in the past two years, but added that 70 were on the weekend or not working days and that the time also included his vacations.

Hatfield said he and his wife spend much of their vacation time with friends in California.

"On many of these days, he said, he left the state in the evening and was back at work in the morning."

"By and large, he said, the time spent on official state business, at governors' conferences or to make beneficial contacts for the state."

Exports Of Farm Products Showing Substantial Gains; Outlook Is Good

WASHINGTON (UPI) — The Agriculture Department said Friday agricultural exports in the first three months of fiscal 1961 totaled \$1,055,000,000, up 6 per cent from the \$994 million recorded in the same period a year ago.

The department said substantial gains occurred in cotton, wheat and flour, and soybeans in the July-September period. Exports of fruits were slightly above the level in 1959. These increases were somewhat offset by declines in feed grains, animal products, vegetable oils, rice, tobacco and vegetables.

Farm exports in September were slightly above those of a year ago. Exports in September, 1960, totaled \$369 million, up 2 per cent from shipments of \$361 million in the same month a year earlier.

The department said indications were that fiscal 1960-61 would be a good one for agricultural exports. They were expected to total \$4.5 billion, which would equal the second highest figure on record attained last year. The record in value was \$4.7 billion in 1956-57. Quantity was expected to equal or exceed last year's record volume shipments. More wheat and flour, soybeans, tobacco, and animal products were expected to be exported while a reduction was likely for feed grains, rice, fruits, and vegetables. About the same amounts of cotton and vegetable oil were expected to move out this year as last when the export volume was unusually heavy.

Exports to the three largest dollar markets in July-September increased by 16 per cent. These markets—the United Kingdom, Canada, and Japan—increased their purchases of U.S. farm products to a total of \$318 million in the three-month period. In the same period last year the value was \$274 million. This \$44 million gain accounted for nearly 75 per cent of the total rise of \$61 million for

the three markets. The United Kingdom, Canada, and Japan—increased their purchases of U.S. farm products to a total of \$318 million in the three-month period. Firemen, Underwriters Remind Public Of Tree Safety Measures

Local firemen and the National Board of Fire Underwriters have a dozen safety suggestions for people who plan to put up real trees for Christmas.

They have found that solutions used to fireproof live trees simply are not completely effective.

And so, here are the 12 safety measures:

1. The tree selected should be a freshly-cut one with needles firmly attached.
2. The tree should be kept out of doors until just before Christmas, since cold air will keep it fresh longer. Once it's up, it will stay green longer, too.
3. The tree should be put up in the coolest part of the room, away from radiators, heaters and the fireplace. This will reduce dehydration and fire danger.
4. The tree should be set in a holder that has a little pail of water for the trunk. A tree drinks quite a bit, and so the pail should be refilled occasionally.
5. The tree should be decorated only with fireproof material.
6. The tree should be kept out of the path of electric trains. A spark could touch it off.
7. The tree should wear only electric lights, never candles. Lights should be checked before placement and those with frayed wiring should be discarded. New strings should bear Underwriters' Laboratories sanction. A switch for the lights should be some distance away.
8. The tree should not be lighted when the family is away.
9. The tree should be cleared of gift wrappings on Christmas morning.
10. The tree should be inspected periodically for dryness. If needles near lights have begun to turn brown, the lights should be changed to new positions.
11. The tree should be discarded when needles start to fall.
12. The tree should be removed the day after New Years, even if it remains fresh.

Engineer Shortage Said Cause of SCD Job Delays

A shortage of engineers and engineer assistants is responsible for delay in achievement of Soil Conservation District projects, it was disclosed at an annual area workshop session here Thursday.

Participating in the discussions at the workshop were supervisors and officers of five area districts at the Klamath County Fairgrounds lecture room. Representatives of Port Rock-Silver Lake, Klamath, Lakeview, Langell Valley and Poe Valley SCD's took part in the all-day session.

Another major problem being studied by district supervisors and officials is education of the public—rural and urban—to understand the SCD program.

More work must be done in experimental projects, the group was told by Eston Porter, chairman of the Silver Lake district. If potential participants in the SCD program can see benefits accruing from experimental projects they would become active in SCD work, he said.

Another major problem facing SCD is unauthorized construction of dams in gullies and small creeks in headwater areas. These dams, if improperly constructed, often give way during periods of heavy runoff. When they give way, large amounts of released water destroy or damage canals and ditches of the district.

The discussions brought out that machinery and equipment belonging to the various districts could be exchanged or leased during periods of peak construction. Inefficiency and delay are characteristics of the present situation, when some districts do not have enough units of heavy equipment to complete a job on a desirable time limit.

A panel discussion brought out several ways for the districts to bring to the attention of the public the projects and objectives of SCD.

BELL THINKS BIG
WASHINGTON (UPI)—David E. Bell, named to the post of budget director Friday by President-elect John F. Kennedy, proved almost immediately that he was able to talk in big figures.

A photographer asked Bell to "say something. Say anything—like 'one, two, three, four.'"
"Forty-five billion," Bell responded.

My fiancée wants a family of four children. I've been rather quiet on this subject because frankly, I think there's nothing more atrocious looking than a pregnant woman. I don't want to ruin my figure, even temporarily. I want children, but the thought of going through several months of looking like a blimp, makes me weak all over. Can you help me?
—FRANCINE

Dear Francine: Science, with all its wondrous miracles has not been able to come up with a substitute for motherhood. If you want babies, you'll have to look pregnant, like everybody else. Nobody says an expectant mother must look like a blimp. Attractive and concealing maternity clothes are available at modest prices. If you're not ready to sacrifice a temporary loss of figure for one of the greatest joys of life, you're not mature enough to be married. Grow up or postpone the marriage till you have a more adult outlook.

To learn how to keep your boy friend in line without losing him, send for Ann Landers' booklet, "Necking and Petting—And How Far To Go," enclosing with your request 20 cents in coin and a long, self-addressed, stamped envelope.
