

Television Set Should Blend

Does your television set stand out in your living room, failing to blend in with the furniture and become an integrated part of your home?

If so, either move it out of the living room or take steps to make it a real part of the room.

A separate television room is ideal if you have the space. If

not, consider putting your set in the recreation room, the den or the dining room — since TV viewing and dining seldom occur at the same time.

If your living room has a fireplace which you no longer use, you probably can build an inexpensive shelf in it to hold your TV.

BRUSH CLEANING

Cleaning paint brushes and rollers is a relatively simple process if you know which kind of solvent to use for which kind of paint.

Use turpentine or mineral spirits for enamels, varnishes, oils and alkyd paints.

For lacquer, it's lacquer thinner; for shellac, denatured alcohol.

And if the paint is a latex emulsion, use plain tap water.

Give Bathroom Modern Look

If your bathroom fixtures look outdated but are in good condition, there is no need to replace them to give your bathroom an up-to-date attractive appearance.

Consider a bathroom with tub along one side wall, toilet and basin along the other and clothes hamper at one end.

The wash basin can be surrounded with a counter top, a hamper built in below, a medicine cabinet built into the wall above and large mirror erected on one side, to hide the toilet.

A plastic shower curtain can curve around the entire two sides of the tub.
