

SUITABLE to a country house or town apartment, this colorful room captures a holiday spirit for year-round dining pleasure. To the gay, relaxed atmosphere, French Provincial dining pieces lend a masterful touch of casual elegance. Intimacy is an additional feature attraction created by the island effect of the dining grouping, with an area rug echoing the compact round dining table, and an easy to reach buffet. Whatever the size of a room may be, if it is approached creatively, it can be the "biggest" and most impressionable asset to both everyday and special events enjoyment.

Entertainment Center Ideal For Hi-Fi Center

More and more, the American home is becoming an entertainment center as well as a place in which to live.

Television brings athletic events, plays and movies into the living room; stereophonic sound systems disseminate the best classical or popular music into every corner of the house.

But they present a problem too.

How do you integrate the entertainment and living features of your home in the most convenient and, most important, the best space-saving manner possible?

One development in the field is "mural television," with the set installed in the wall and framed to match room decor in much the same manner of a picture frame.

If you're planning to build a new home, some experts recommend that wall installation of your TV set — and stereo sound system, too — be included in the

plan. In this way, you can plan your room lighting with the special television requirements in mind and save for other purposes the space usually consigned to the TV cabinet.

Another home entertainment idea places the television set and stereo system in a room divider.

The TV is set on a swivel arrangement so that it may be viewed from the living room during certain hours and swung around to be watched from the bedroom or kitchen at other times.

A stereo system can be placed in the same divider with the player unit on the middle or bottom of the three shelves and twin speakers on the outer corners of the top shelf.

The arrangement also provides room for storage of frequently played records plus ornaments to dress up the otherwise functional use of the room divider.
