

THE OWL HOOTS

Don Orrell who has been head of the Electronics Department since January, 1948, has retired from the supervisory position to leave the "ulcer-creating" responsibilities to a younger man, Robert E. Baird. Don is following the example of Charlie Martin who made the same decision in Medical Technology a few years ago. He will continue teaching electronics without change in status. He will be in a better position to enjoy his new home at 2435 Corvallis Street and to have more time to lute the fish from the deep pools during the summer.

Francis Spencer, instructor in auto body and fender technology, reports that the automotive department has a year's subscription to the National Automobile Dealers Association Magazine as a gift from Jim Winde, owner of the Winde Buick Company. Spencer has asked to borrow a copy of the magazine which contained information about a number of schools that teach auto mechanics including Oregon Technical Institute. Jim not only gave him the issue requested but added the gift of the future issues.

Max Saunders, instructor in accounting technology, received a couple of letters last week from alumni in accounting who are making special progress in the field. Marvin E. Wheeler, with an Air Force group in Alaska, may have an opportunity for two free years of college education as a result of the background training he received at OTI. The other letter from Maurice K. Behrke contains the following paragraph: "I finally got around to taking the CPA examination last November. I passed the problem sections and have received my public accountant's license. Now all I have to do is pass theory, law, and auditing to get my CPA license."

An office machines graduate, Dale McCulloch, sent a letter to Gene Larson, counselor, stating that he has a very good position with an office machine company in Eureka. He is receiving an attractive weekly salary with his first raise due in six weeks and periodical raises thereafter. He was very complimentary of his course at OTI but wished he had an opportunity for more training on adding machines and calculators.

A seminar was sponsored on the campus on Monday and Tuesday by the Hamilton Engine Sales Company of Portland for all diesel students. Chuck Hamilton, owner of the company; Lynn Perrott, sales representative for the Cramer Machinery Company; Clarence Zerner, Clarke Equipment Company, and Don Kagy, manager for Allis Chalmers at Oakland, presented the seminar information.

They discussed the research, testing laboratory results, and new developments in production of machinery. Mr. Hamilton ended the seminar with good advice to students on the important considerations in applying for a job. He cited the kinds of attitudes and methods of approach which lead to success and ended with the statement—"Don't forget, fellows, the world doesn't owe you a living."

Mr. Jacobi, chairman of X-ray technology, has a letter from an M.D. (radiology and radioactive isotopes) who has had two Oregon Tech X-ray graduates and is inquiring about a third. The last sentence in the letter states—"Again I wish to state, you turn out very superior X-ray technicians from your school."

Gilbert L. Penrose, compliance officer, Bureau of Labor Management Reports, Seattle Area Office, came to the campus on Thursday to assist James Boyle, division head, allied arts and sciences, in making plans for the labor reporting seminar which will be held on the campus on March 8. The seminar is for labor union officers who are responsible for making out reports required by labor law.

John Yankovich, a recruiter from International Business Machines Corporation at San Jose, spent Wednesday and Thursday on campus interviewing students. Two men from Sandia Corporation, William A. Little, division supervisor, telemetry development, and Marlin Pound, personnel representative and coordinator of technical institute recruitment, interviewed 18 students on Thursday. Seven OTI alumni are

presently employed at IBM and 15 at Sandia. The recruiters in each case stated that there were several students interviewed that they were interested in for employment.

Counselor Gene Larson is finding his Saturdays filled with hosting students and parents or groups of students who come to take a look at Oregon Tech's program. During the last five Saturdays groups have come from Yreka, Medford, Grants Pass, Ashland, Central Point, Eugene, Portland and Corvallis. He was in the process Thursday of answering 12 more letters requesting permission to visit Oregon Technical Institute.

The important Ways and Means Committees of both the House and the Senate visited Oregon Tech on Saturday. They inspected the new campus site early Saturday morning and then went to the present campus for an auto tour and meetings to discuss the new campus plans presented by Skidmore, Owings and Merrill and a general discussion of the institute and its program and budget.

Charles Jacobi, chairman of X-ray technology, has received official confirmation of his reappointment to the chairmanship of the Educational Committee of the Northwest Conference of X-ray Technicians for the period 1960-63. The Northwest conference includes the five Northwestern states. One representative from each state is on the committee and Charles is representing Oregon, as well as being chairman.

Mr. Jacobi also received a request from Keleket X-ray Corporation to give a one-night refresher course on basic circuitry and physics of X-ray at Redmond on March 8. He will lecture to the technicians in the Bend, Redmond, Prineville, and Madras areas. The refresher course has been arranged with the approval of the local radiologist in the Central Oregon area. He will also address a similar group in Eugene in April.

Mr. Jacobi has received special recognition in his election to full membership in the American Nuclear Society. The organization was formed under the auspices of the National Academy of Sciences eight years ago for the promotion of education, research, and development in nuclear engineering. The society has grown since that time until its fifth and newest division, isotopes and radiation, has been established. It is within this division that Charles became eligible among other professors, researchers, and industrial representatives from all parts of the United States. Some of the research work which he is doing at OTI may be more applicable for publication in the journal of this society than in "The X-ray Technician."

The Klamath Falls Parks and Recreation Department sponsored program at the Klamath Auditorium for the week March 6 to March 12 is as follows:

MONDAY	
Playschool	9:30-11:30 a.m.
Free Play	3:30-5:00 p.m.
Badminton	
Instruction	3:30-5:00 p.m.
Girls' Recreation	7:00-8:30 p.m.
Women's Recreation	8:30-9:30 p.m.
TUESDAY	
Playschool	9:30-11:30 a.m.
WEDNESDAY	
Playschool	9:30-11:30 a.m.
Golden Age Club	1:00-4:00 p.m.
Free Play	3:30-5:00 p.m.
"Hi Nite"	7:00-9:00 p.m.
THURSDAY	
Playschool	9:30-11:30 a.m.
Free Play	3:30-5:00 p.m.
Men's Volleyball	
League Organization	7:00-9:00 p.m.
FRIDAY	
Playschool	9:30-11:30 a.m.
SATURDAY	
Free Play	9:00-12:00 a.m.
Baton and Cheer-leading Instruction	9:30-11:30 a.m.
Free Play	1:00-4:00 p.m.

Petty Larceny Charge Filed In Market Shoplifting Case

A petty larceny charge was filed Friday morning in district court against a 46-year-old transient, Jesse Logan Kelley.

Kelley was accused by clerks of the Market Basket, Ninth and Pine streets, with stealing some cheese and some cigars. He was questioned after store employees saw a carton of cigarettes fall from his coat.

City police arrested Kelley and found he had cheese, cigars, cigarettes, a bottle of wine and a pair of rylons concealed in the folds of his coat.

Other police reports: Frank G. Autstin, Willard Hotel, said a miniature camera worth \$200 was stolen Wednesday night from his coat, which was hung on a coat rack in the Ponderosa Room.

Frank Rickey of Rickey's Used Cars said a car was stolen from in front of 112 South Eleventh Street, but was later recovered in Dorris.

George Swearingin, 231 Martin Street, said his pet brown Ches-

apeake Bay retriever was missing. The dog had a collar and license.

German Course Offered Here

Anyone interested in taking an elementary German course here, offered by the state System of Higher Education General Extension Division, is requested to call Ed Hansen, biologist, at the Klamath Branch Experiment Station, TU 4-4641.

Hansen and several other local men are attempting to bring the course here to help them in their efforts to obtain doctorate of philosophy degrees.

A minimum of 10 students is needed before the course will be instituted. The course would yield probably, four quarterly hours of college credit.

"DENNIS THE MENACE"

"DID YA HAVE TO CALL ME NOW? I'M EATIN' DINNER! DON'T YA HAVE NO MANNERS?"

OTI Plans Labor-Management Seminar

A seminar and workshop will be held at Oregon Technical Institute next Wednesday to discuss labor and management reporting as required in the Disclosure Management Reports of the United States Department of Labor and Oregon Tech. James Boyle, head of the Allied Arts and Sciences Division at OTI, and Gilbert L. Penrose of the bureau have arranged the program.

Youth Held In Car Theft

A 15-year-old Klamath Falls youth was taken into temporary custody Thursday and charged with stealing a car in Lakeview in December.

Juvenile authorities said the youth and two other boys from Lakeview were involved in the theft of a pickup truck from the Briscoe Garage in Lakeview on Dec. 30. The truck was owned by Ben Loht of Lakeview. The trio was also questioned about another car theft on Dec. 27.

The 15-year-old told juvenile officers that the theft wasn't his idea. He also denied knowledge of the theft of a tool box and some tools from the truck. He said they "just drove around."

The two Lakeview youths have had juvenile hearings in Lakeview and the Klamath Falls youth is scheduled for a future juvenile court appearance.

FEARS U.N. CRISIS
ACCRA, Ghana (UPI)—President Kwame Nkrumah said Wednesday night that "colonialism" was threatening the United Nations with its worst crisis since its founding. He charged that the U.N. mandate for handling the Congo problem had not been faithfully followed.

Labor-management bureau officials will explain the two reports required of every labor union by March 31, which is 90 days after the end of the unions' fiscal year. Speakers are Robert C. Stevens, acting area director of the Seattle office of the bureau, and Don E. Walker, compliance officer with the Seattle office.

Labor union officers and members have been invited to attend the seminar. There will be a nominal registration fee to include lunch on the campus. Those interested should write to Boyle at OTI.

BARGAIN SPECIAL!
HARD PASTE \$8.50
WAX JOB
MOST CARS
plus wash, vacuum, clean chrome
Reg. \$12 to \$20. Phone 4-3112
