Jet Crash Kills 77 In Morocco

RABAT, Morocco (AP)—A French jet airliner crashed into a ravine near Rabat Tuesday night and burst into flame, killing all 77 persons aboard.

Rabat and continue on to Casablanca, the end of its flight. The Caravelle, named "The Bear," was the newest in Air France service. It had begun carrying passengers only May 30.

Hope Fades For Quick GM Peace

DETROIT (AP)—Hope vanished today that General Motors Corp. and the United Auto Workers Union could reach agreement by Thursday on a new contract and end crippling local-level strikes that have closed more than 90 GM plants.

The UAW, however, ordered all local unions which already have reached at-the-plant agreements to go back to work, and it told others to end strikes as quickly as they reach settlements.

Paar Show 'Typical'

NEW YORK (AP)—"About all you can say was that it was typically Jack Paar."

That was the reaction of Sen. Jacob K. Javits, R-N.Y., to the highly controversial "Jack Paar in Berlin" film telecast Tuesday night.

School Aid Plan Licked

WASHINGTON (AP)—President Kennedy took a prestige-denting political licking when the Senate sided with the House in voting to continue two school aid programs until 1963.

For all practical purposes this action, accomplished Tuesday on a 45-40 Senate vote, probably means that Kennedy will not get the full-fledged aid to education program he is certain to propose again next year.

Gold Capsule Catch Hoped

VANDEMBERG AIR FORCE BASE, Calif. (AP)—The Air Force hopes to recover the orbiting capsule of Discoverer XXX by Saturday.

The 300-pound, gold-plated capsule was blasted into orbit here Tuesday at 12:28 p.m. It is orbiting every 92.4 minutes in a path from 134 to 345 statute miles away from the earth.

Belinere Aid

BERLIN (AP)—West Berliners were called on today to show gratitude to the United States by raising money to help victims of Hurricane Carl.

The newspaper Morgenpost began the drive with an appeal under a banner headline reading: "Berliners—at this hour we want to show our thanks to America."

WATERY WRECKAGE — Storm driven waters of hurricane Carla inundated Texas City, Tex., as shown in the picture above. The death toll today reached 15 with a possibility that more bodies would be found when the waters receded. The recovery chore was complicated by the pollution of water supplies.

Carla's Ruin Faces Rebuilders

GALVESTON, Tex. (AP)—Texas and western Louisiana areas in watery ruin turned today to a staggering task of rebuilding left by Hurricane Carla, one of the mightiest ever to roar out of the Gulf of Mexico.

Ten of the deaths occurred as the dying winds of Carla hurled back tornadoes after the hurricane's center was many miles inland. Finally shorn of its vicious gales, remnants of the giant tropical storm moved northeastward out of Texas toward Missouri.

In a telephone conference Tuesday night, President Kennedy told Texas Gov. Price Daniel that the director of the Office of Civil and Defense Mobilization, Frank B. Ellis, would arrive in Houston Thursday to inspect storm-ravaged areas.

National Guardsmen, civil defense and local officials sloshed about in devastated industrial centers and small places as huge tides, winds and rains diminished. Many residents who fled northward will not be permitted to return, however, until water, sewer and power service are restored.

Reds Shoot 7th Blast

WASHINGTON (AP)—The Soviet Union has touched off another nuclear blast in the atmosphere—the seventh since it resumed testing 13 days ago.

The Atomic Energy Commission said the blast had the force of several million tons of TNT. The test early Tuesday was in the air above the arctic island of Novaya Zemlya—the third test in that area since Sunday. The explosion matched the largest in the current series.

Extension Gets Okay

WASHINGTON (AP)—A two-year extension of the controversial Civil Rights Commission was approved by the House today by a 298-106 roll-call vote which added it to an appropriation bill.

The commission, created four years ago, technically went out of business last week. The extension originally was added by the Senate to a money bill passed earlier by the House. It would keep the commission in business until Sept. 30, 1963, and give it \$900,000 to finance its work during the present fiscal year.

Troubled Jet Lands Safely

SEATTLE (AP)—A Western Airlines 720 jet landed safely Tuesday night after trouble developed in the hydraulic system, cutting braking power.

Turbo-fans on the plane were reversed and it landed without incident.

UN Downs Katanga Succession

LEOPOLDVILLE, the Congo (AP)—The United Nations announced today a forceful end to Katanga's secession from the Congo. U.N. troops downed military resistance in a blood-spilling fight of seven hours at Elisabethville, the provincial capital.

President Moise Tshombe fled, denouncing the attack, and the Leopoldville central government appointed an administrator to take over the mineral-rich province.

The Katanga secession is over, U.N. headquarters here was told. Its Elisabethville representative, Conor Cruise O'Brien, said Katanga is now a Congolese province.

This would mean an end to the independence of the lush, copper-laden plateau here, proclaimed Tshombe 14 months ago. It also would mean diversion of millions in state revenues from Katanga's \$950-million annual production to the treasury of the central government.

'Chutes Land Ship In Atlantic

CAPE CANAVERAL, Fla. (AP)— The United States sent an "artificial astronaut" on a one-turn orbital ride around the earth today and brought the space vehicle back to a landing in the Atlantic.

The Project Mercury space capsule went up at 9:40 a.m. from this missile test center on the nose of a mighty Atlas rocket. An hour and 46 minutes later, the National Aeronautics and Space Administration reported the space traveler had been lowered on its parachutes.

The intended impact area was 230 miles east of Bermuda. Recovery ships and planes hastened to the area to attempt recovery. An airplane spotted the floating capsule minutes after it landed.

Reverse rockets were set off as the space traveler sped over the Mexican west coast, to slow it for a descent into the Atlantic east of Bermuda. There an attempt was made to recover the project Mercury capsule, just as would be done if a spaceman were aboard.

If the space craft parachutes safely into the Atlantic Ocean after one circuit of the world, plans call for a chimpanzee and then a man to be sent into triple orbits about the earth, hopefully—but not optimistically—by the end of the year.

A powerful Atlas missile thundered aloft at 9:04 a.m. with the two-ton capsule perched on its nose. Bolted inside the spacecraft was a gray box called a crewman simulator which was to "breathe, sweat and talk" in realistic fashion.

The blastoff looked perfect to bystanders. The Atlas' mission was to hurtle the 9-foot-tall bell-shaped capsule into orbit at a speed of 17,400 miles an hour. The orbit was to range from a low altitude of 100 miles to a high point of about 150 miles.

The 93-foot rocket assembly sped into a partly cloudy sky spewing a triple tail of fire from its three big engines. About 30 seconds after liftoff it arched over on its intended trajectory toward the northeast, vanishing from sight about three minutes after launch.

The tracking station at Bermuda reported about a minute after launch that it had acquired signals from the space craft as the Atlas rose into the sky. After one 110-minute circuit, reverse rockets were to fire to slow the vehicle so it would be drawn into the earth's atmosphere for a landing 230 miles east of Bermuda. A large recovery fleet stood by in the impact area.

Tanks Stop OAS Riots

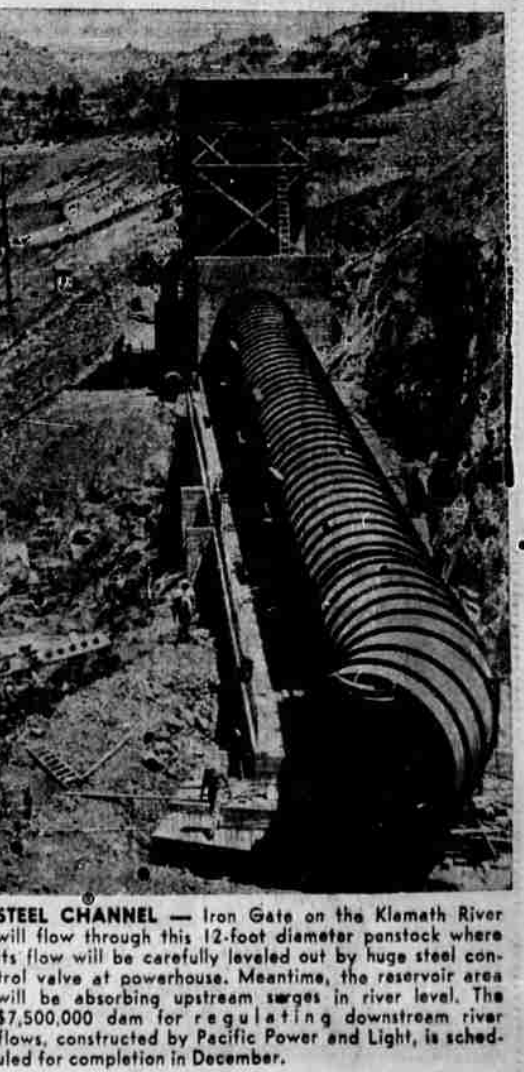

CIUDAD TRUJILLO, Dominican Republic (AP)— Tanks and troops restored order today after rioting by opposition political groups left four dead and more than a score injured.

The violence was sparked by the arrival of a four-man team from the Organization of American States Tuesday. They are investigating the possibility of lifting some of the diplomatic and economic sanctions on the Dominican regime that took over after the assassination of Generalissimo Rafael L. Trujillo last May. The opposition fears this would entrench Trujillo's heirs in power.

There were conflicting versions of what happened near Cuarte Bridge over the Ozama River around noon Tuesday, when a crowd of about 5,000, mostly from a nearby working class neighborhood, gathered to greet the OAS delegates.

Power Officers Inspect Iron Gate Dam

Officers and directors of Pacific Power and Light Company inspected the progress in the construction of Iron Gate Dam on the Klamath River east of Hook, Calif., Wednesday morning, prior to a quarterly meeting of board members in Medford.

STEEL CHANNEL — Iron Gate on the Klamath River will flow through this 12-foot diameter penstock where its flow will be carefully leveled out by huge steel control valve at powerhouse. Meantime, the reservoir area will be absorbing upstream surges in river level. The \$7,500,000 dam for regulating downstream river flows, constructed by Pacific Power and Light, is scheduled for completion in December.
