

# White Fined For Punch

LUSAKA, Northern Rhodesia (AP)—A swabuckling white businessman was fined \$140 today for punching the jaw of G. Mennen Williams here two weeks ago. He chose to pay the fine rather than spend two months in jail.

Stuart Finlay-Bissett, 58, was given the choice by a judge after he pleaded guilty today to common assault for roughing up the U.S. assistant secretary of state for African affairs, Finlay-Bissett doesn't like American policy in Africa.

Magistrate I. M. Eweans called it "an act of stupid boogalomanism toward a high-ranking guest."

# Chancellor Recommends Rent-Free Home For Strands

SALEM (AP) — Dr. John R. Richards, chancellor of the state system of higher education, said today he will recommend that Dr. and Mrs. A. L. Strand continue living rent-free in a state-owned house. Two members of the board, however, said they opposed the plan.

Strand lived in the house at Corvallis as president of Oregon State University from which he recently retired. Richards said he will ask the board at its separate meeting today to approve the continued use of the house. The Higher Education Board and the state Board of Education meet jointly through the morning.

Richards said he will ask that Strand be appointed as director of the system's new office of inter-institutional research with a \$17,500 annual salary.

One of his first duties in that job, Richards said, would be to study feasibility of putting both the Oregon and Oregon State campuses on a year-around operating basis. He said Strand currently is studying 12-month college operations while en route home from a trip to Europe.

Board President William E. Walsh, Coos Bay, and Vice President Charles R. Holloway Jr., Portland, opposed letting Strand have the house rent free.

Walsh described Strand as admirably fitted for the new post and called the salary "adequate but not an overpayment." He said the Strands should be charged a reasonable rental for the house so as not to break a precedent that allows only the chancellor and heads of institu-

tions to have rent-free housing. The board did not expect at this meeting to name a new chancellor to replace Richards. He said he expected his resignation to be effective before the board's October meeting. Richards is taking a California post. Members of the board's Finance Committee Monday indicated they will look into payments that go to school districts in connection with student teacher training. H. A. Bork, higher education system comptroller, told the board payments vary from nothing to \$30 per student teacher per term. He said the cost varies because of differences in salary costs from district to district, differences in supervision and differences in the number of students. In view of the disparity, J. W. Forrester Jr., Pendleton, board member, suggested the board look toward graduation. The cost in-

## Forest Area Trip Eyed

WASHINGTON (AP) — A nine-day field trip is planned by a House agriculture subcommittee, starting Oct. 1, to inspect national forest areas in Washington and Oregon. The group will meet in Spokane, travel to the upper end of Lake Chelan Oct. 2, view the north Cascades area from the air Oct. 3, stop overnight in Seattle Oct. 3, tour the Olympic National Park Oct. 4, and travel to Portland Oct. 5 for hearings there Oct. 6-7. The legislators will go down the Oregon coast to the vicinity of Newport Oct. 8, inspect the Oregon dunes area Oct. 9 and spend the night at Eugene, and check the Wallowa Lake area Oct. 10. Rep. George M. Grant, D-Ala., chairman of the subcommittee, said Monday he did not know how many members will make the trip.

The Pyramid of the Sun has a larger base than Egypt's Great Pyramid and covers more ground than any known pyramid in the world.

# GRANDMA HAD TO HEAT WITH FIRE, BUT YOU DON'T!

*Electricity Takes The Flame Out of Heating!*

**Prehistoric man** found that if he set fire to fuel in his cave, he stayed warm. Smoke got in his eyes, and he sooted and smudged his cave, but he stayed warm. Usually warmer on one side than the other. For centuries, man looked for a better way. Then, finally, in our own modern day, electric heat was perfected. Now, most moderns choose to heat with electric energy rather than use the caveman's way. Why? Because only electricity is flameless, fumeless, and foolproof!

**CONVENIENT & FLEXIBLE:** Heat your home by zones, with an electric heating device fitting the need of each room or area . . . each operating independently and automatically . . . each thermostatically controlled to provide the exact temperature required in a given area . . .

**ECONOMICAL:** Electric heating systems are not only less expensive to install; properly installed, they provide advantages that no flame-type system can match, at an operating cost comparable to most. Maintenance and cleaning costs are eliminated. Walls and decor in your home are not smudged. Heat you pay for is not lost through flues and vents.

**SAFE:** Eliminate fire, and you rid yourself of perhaps the greatest hazard in your home.

**COMFORTABLE:** Electric heat creates no drafts. It wraps you around like a blanket, in sunshine silence, cleanliness, and warmth.

**ONLY ELECTRICITY IS FLAMELESS, FUMELESS AND FOOLPROOF!**

NO MONEY DOWN: Ask any Cal/Ore Electrical League Dealer or Contractor about the Heat-On-Time-Plan. You can have a modern electric heating system in your home without down payment, and for as little as \$10 a month!
