

We The Women

Winning, Holding Friends Still Same Old Formula

Ruth Millett
Newspaper Enterprise Assn.

You'll always have friends if—
It's really friends you want—and not just acceptance by some particular crowd.

You refuse to discuss your friends' faults with anyone or to dwell on them at length in your own mind.

You make an effort to do things at your friends' convenience, instead of expecting others to inconvenience themselves for you.

You find or make the time to keep in touch with friends, whether they live near or far away.

You are interested in many things, and so don't have to spend all of your time with others talking about yourself.

You are truly happy when good things happen to your friends and are quick to show your admiration and approval for anything they do that they have a right to take pride in.

You are as willing to listen as to talk and can hear a story through without interrupting in an effort to top it.

You can listen to your friends' problems without offering unasked-for advice.

Your friends know that if they

tell you something in confidence it won't be passed on—not to anyone at all.

In speaking of your friends you always try to show them in as good a light as possible.

Your friends know that you aren't so supersensitive that they have to handle you with kid gloves.

You can be gracious when either giving or accepting a favor.

You choose your friends for what they are, not for what they have or what you think they can do for you.

You never reach the point where you aren't interested in making new friends.

HIDE THE THIMBLE

When you darn the ends of glove fingers, slip a thimble on a finger and put your hand into the glove. This keeps the glove in shape and prevents a pricked finger.
