partly cooked, then dried. Reconstituted in water, the slices swell to 1/4 inch and cook in about half the usual time. They are processed with small amounts of calcium chloride for firmness and sodium sulphate to lengthen shelf-life and protect the natural white color of raw potatoes. They may be used in any recipe calling for raw or cooked potato slices, such as casseroles, potato salad or home fries.

WEIGHT-WATCHERS NOTE NEW ANGEL CAKE

There's a new Lemon Chiffon Cake Mix on the market. Its ads say "yellow, as high, light and tender as angel food but rich and moist as butter cake." An average slice has only 150 calories. If calories are not a problem, recipes for meringue chiffon or citrus loaf cake are inside the package. The cake is good with whipped cream.

"Flavor-Foil" resembled aluminum foil with one notable difference: one side of it is coated with a shortening which in turn is impregnated with seasoning. Frozen foods using "Flavor-Foil" as the inner wrap could be cooked as the food cooks, the shortening coating would melt and baste and season the food.
