Zeus Anti-Missile Shot Scheduled Over Pacific

WASHINGTON (AP) — The Army plans to try again next weekend to fire its Nike Zeus antimissile out over the Pacific. The test, probably on Saturday, will come at a time when the Army is bidding anew for money to start limited production of parts for the controversial system.

Nearly a month ago, on Sept. 9, Army technicians made their first effort to shoot the Nike Zeus from Point Mugu, Calif. Shortly after the missile shot skyward it exploded.

Although rebuffed repeatedly in the past, the Army is known to be seeking again to win an allocation in next year's defense budget for starting production of long-range items for the Zeus system.

Officials declined to say how much money was being sought, but it appeared likely the request might be about \$100 million. The Army hoped for that amount a year ago but was turned down.

In addition to production money, the Army is asking for about \$200 million in the 1963 fiscal year for further development work on the Zeus, the most advanced U.S. antimissile system. This would bring to about \$1.4 billion the amount applied to Zeus research and development.

Testifying before congressional groups earlier this year, Secretary of Defense Robert S. McNamara spoke of "widespread doubts as to whether the Nike Zeus system should ever be deployed."

He said then that the system, mostly above ground, is vulnerable to ballistic missile attack. He also indicated he was not convinced that the Zeus could work effectively against enemy missiles screened by decoys.

Since then, resumption of Soviet nuclear testing has given rise to speculation that the Soviets may be working on an antimissile system.

The Army hopes this development, plus Soviet threats to build a super nuclear bomb with the explosive power of 100 million tons of TNT, may cause defense officials to look more favorably on the Zeus.

The Sept. 9 test was aimed at trying out two of the Zeus rockets' three stages, as well as the im-

portant missile tracking radar and guidance computers. Before and since the Sept. 9 shot Army specialists have conducted what they said were successful tests of the Zeus' powerful second-stage rocket at the White Sands missile range in New Mexico. This new motor uses an improved solid fuel.

Why not admit that certain fields are too much for you instead of pretending to know everything?—MADAME Z

Dear Ann Landers: When I was 15 I made the biggest mistake a girl can make. My family sent me to a home for unwed mothers and I stayed away from this town for almost a year. I tried to fool myself into thinking nobody knew, but I was wrong.

I'm almost 20 now and I've made a big effort to hold my head up and forget the past—but people just won't let me forget.

Last night I had a date with a wonderful fellow and we went to a movie. Two girls I knew in high school were sitting in front of us. They were with boys I didn't know. The girls turned around and said hello and then they began to giggle and whisper. I could hear just enough to know they were telling the boys all about me.

After almost five years of leading a decent life don't you think people should forgive and forget? Please tell me what I can do to be accepted.—BLACK PAST

Dear Black Past: It's cruel and unfair but this is the penalty a girl must pay for "the biggest mistake a girl can make." There is no way to dim the memory of a gossip or to close his mouth. A girl with your history is better off moving to a new community. I strongly recommend it.

Confidential to Nutty Over Her: Just plain Nutty is more like it. A man who would join such a line-up is wacky.

Are you tempted to smoke because the crowd does? If so, send for Ann Landers' booklet, "Teenage Smoking," enclosing with your request 10 cents in coin and a long, self-addressed, stamped envelope. Ann Landers will be glad to help you with your problems. Send them to her in care of this newspaper enclosing a stamped, self-addressed envelope.

Robert W. Anderson, Bakersfield petroleum geologist, also is associated with Bruer. The leasing was reported to be financed by Gen. Frederick L. Anderson, USAF, retired; Laurence Duerig, Palo Alto, Calif., and Edward H. Heller, San Francisco.

Anderson, who at the close of World War II was directing bombing operations in Germany, is listed by who's who as a banker in Kingston, N.C.

Heller is listed in who's who as a banker and industrialist. E.S. Hancock, Bakersfield, and D.L. Hopkins, Salem, have been contacting property owners for the leasing.

Hancock and Bruer said that "local geologic field work and regional study of the central Willamette Valley indicate the presence of a structure which may favor the accumulation of oil and possible gas."

The same group leased a large block in the Dallas-Amity area in 1958 and 1959 and Reserve Oil and Gas Co. drilled an exploratory well. Only a non-commercial quantity of natural gas was found.

Doerr; his wife, Vivian, 44; Robert Mann, 38, and his daughter, Roberta, 11, also of Oceanlake, were in a car that crashed into one occupied by Mrs. Inetta Dibble, 39, of 5633 S.E. Harold Portland, and her daughter, Loree, 16.

The Dibble girl was taken to a McMinnville hospital with critical head and other injuries. The others went to the same hospital where attendants said Mrs. Doerr's condition also was critical. Mann and his daughter were said to be in fair condition.

The collision happened about four miles west of Wallace Bridge, near Valley Junction, on a route between McMinnville and the coast.

The accidents raised Oregon's traffic death toll for the year to 373 in the Associated Press tabulation.

Entered as second class matter at the post office at Klamath Falls, Oregon, on August 25, 1960, under act of Congress, March 3, 1879. Second-class postage paid at Klamath Falls, Oregon, and at additional mailing offices.

Tea-Leaf Reader Lost Three Times

By ANN LANDERS

Dear Ann Landers: I noted a letter in your column recently knocking palmistry and tea-leaf reading. Why don't you stick to teenage monsters, wife-beaters and peanut-brain housewives?

I've been practicing these sciences for many years and I have profited handsomely. I was married twice and both would have been catastrophic had I attempted to keep them together. The leaves told me to get out and I did.

By reading my own palm I was able to extricate myself from a business venture after losing only \$2,000. Had I continued (as the financial experts advised) I would have lost a great deal more.

Why not admit that certain fields are too much for you instead of pretending to know everything?—MADAME Z

Dear Madame Z: Why didn't you check with the leaves and read your palm before you married the two beaus and before you landed in that no-so-hot business deal?

Dear Ann Landers: Is it true that when liquor goes in — the truth comes out?

I'm seeing a man who, on the fourth drink begins to talk about what a wonderful wife I'd make.

SALEM (AP)—The leasing of some 5,000 acres of land just south of Salem and tentative plans for extensive oil exploration were reported Monday by the Salem Capital-Journal.

The leases were being taken in the name of Wesley G. Bruer, petroleum geologist of Bakersfield, Calif., and a 1950 graduate of Oregon State University.

Assembling of the block is nearly complete and if it is completed there is a good chance that exploratory drilling will follow in the future, an announcement by Bruer said.

Robert W. Anderson, Bakersfield petroleum geologist, also is associated with Bruer. The leasing was reported to be financed by Gen. Frederick L. Anderson, USAF, retired; Laurence Duerig, Palo Alto, Calif., and Edward H. Heller, San Francisco.

Anderson, who at the close of World War II was directing bombing operations in Germany, is listed by who's who as a banker in Kingston, N.C.

Heller is listed in who's who as a banker and industrialist. E.S. Hancock, Bakersfield, and D.L. Hopkins, Salem, have been contacting property owners for the leasing.

Hancock and Bruer said that "local geologic field work and regional study of the central Willamette Valley indicate the presence of a structure which may favor the accumulation of oil and possible gas."

The same group leased a large block in the Dallas-Amity area in 1958 and 1959 and Reserve Oil and Gas Co. drilled an exploratory well. Only a non-commercial quantity of natural gas was found.

Job Study Said Needed

SALEM (AP) — The problem of youngsters dropping out of school and jobs for youth were outlined Monday by Gov. Mark Hatfield as matters that need study.

Hatfield asked a governor's Committee on Children and Youth to look into both at a meeting in Salem.

He reviewed gains made at the last Legislature through improved laws that resulted from the work of the committee. He urged it to give school dropouts and jobs for youth priority attention.

Cecil Posey, Oregon Education Association executive secretary, reviewed for the committee work that was being done to improve the standards of teachers.

Number System Designed To Stop Tax Cheating

By VINCENT J. BURKE

WASHINGTON (UPI) — Warning to tax cheats: The federal tax collector is going to get your number.

Under terms of a bill to be signed soon by President Kennedy, the government — starting next year — will assign an identification number to each taxpayer and require him to use it in filing his income tax returns.

This will set the stage for the federal government to undertake for the first time to police the accuracy of all income tax returns. At present, only a fraction of returns are spot-checked. The numbering system will enable the Internal Revenue Service to check all returns through use of new electronic equipment.

A taxpayer's Social Security number also will serve as his tax "identification number." Those not covered by the Social Security system will be assigned tax identification numbers.

File On Taxpayer
The Internal Revenue Service will use numbers to set up for each taxpayer a single permanent file containing all income information it receives from him, his employer and other sources. This will enable tax agents to cross-check for accuracy on a broad scale.

The new law provides that a \$5 penalty tax can be imposed on a taxpayer each time he fails to attach his number to his tax return or refuses to give his number to his employer, to his broker or to anyone else required to file reports with the Internal Revenue Service relating to his income.

Congressional tax experts are confident that the new system will have far-reaching effects in curtailing tax cheating and that, as a result, more revenue will flow into the Treasury.

The legislation, recommended by the Kennedy administration, swept through Congress without debate in the closing days of the recent session.

Must Be Consistent
At present, the millions of reports received by the Internal Revenue Service are filed separately — including tax returns

from the same taxpayer for different years. This makes it almost impossible to match up tax returns with informational returns to check for accuracy.

However, under the new system anyone who cheats on his taxes will have to be consistent from year to year — or run the risk that agents will be calling him in to explain the inconsistencies.

The numbering system will not be used until after 1961 returns are filed next spring. Thus, under present plans, the first reports in each taxpayer's file will deal with 1962 income.

Each taxpayer's file will include reports now required from his employer and from any broker or corporation paying him \$10 or more a year in dividends and from any banks or savings and loans associations paying him interest of \$600 or more annually. The taxpayer's file also will have cross-references to the re-

turn of his wife, if she files a separate one, and to the returns of his business partners.

Now! PROMPT 3-WAY CHECK OF DIARRHEA DISTRESS!

New York, N. Y. Here's news of wonderful new relief for miseries of common diarrhea often caused by overindulgence in food or drink, "stomach colds," change of water or diet, "toxins," "nerves," etc. Remember, diarrhea strikes without warning whether you're at home, at work, at play or traveling. So—be prepared with convenient DIAR-AID—the ONLY tablets compounded to give prompt 3-way relief: 1. Consolidate loose movements. 2. Calm painful cramps. 3. Soothe irritated tissues. Get clinically proven DIAR-AID Tablets, only 98c. DIAR-AID

At present, the millions of reports received by the Internal Revenue Service are filed separately — including tax returns
