Now, at last, a practical low cost electronic miracle is here to relieve distress among millions of hay fever sufferers.

For nearly 5 years hundreds of patients have been tested and treated with ionization, proving that negative ionization offers almost immediate relief to most people with hay fever and related allergies!

The evidence speaks for itself! Based on this research, almost immediate relief for 63% of all hay fever sufferers treated resulted when the air was enriched with an abundance of beneficial negative ions.

This is exactly what the Philco Ionitron does. It enables you to enrich the air you breathe with the right balance of negative ions wherever you are, by simply plugging it into any standard outlet. It's portable! Lightweight and compact as a table radio. Quiet as an electric clock. Economical as a small light bulb. And it's most effective at a distance of 6 to 8 feet.
