Aid Rushed To Hurricane Stricken Honduras

48 Die In Airliner Crash

RIO DE JANEIRO, Brazil (AP)—A Brazilian airliner smashed into a hillside and burned in a Recife suburb today and an airline spokesman said 48 of the 85 persons aboard perished. He said 35 of the 76 passengers and two of the crew of nine survived. There were no U.S. citizens aboard, the airline said. The plane, a Panair do Brasil DC7 was en route from Lisbon, Portugal, and was coming in for a stop at Recife, on the northwest coast of Brazil, before making its final scheduled stop here. The two crewmen who escaped were the purser and a stewardess. The plane was making its landing approach when it hit the hilltop near the Recife airport. Witnesses said two explosions occurred before the plane hit the hill and burst into flames.

Town Razed By Storm; Two Killed

MIAMI, Fla. (AP)—The first relief plane landed safely at Belize today with food and medicine for the hurricane-battered British Honduras capital. Capt. Dean Ricker, pilot of the Tan Airlines mercy flight which took off from Miami, reported from the air that the Central American seaport "appeared to be 50 to 75 per cent destroyed" by rampaging Hurricane Hattie. The message was relayed to Miami via Honduras. The British frigate Trowbridge was expected to reach the stricken city today and so were two United States destroyers which had been cruising off Honduras. Tan Airlines' Miami office said its airplane was placed at the disposal of the governor of British Honduras to fly injury victims to hospitals in Guatemala and Honduras if advisable. Most of sea-level Belize's inhabitants apparently fled to higher ground before Hattie, the season's eighth tropical storm, flung 9 to 10 feet of water into the city. The State Department said it had received no word from U.S. diplomats stationed in Belize. They were identified as Consul Richard Geppert and Vice Consul Richard Connelly. Both have their wives with them and each family is said to have a baby. Rockwood Foster, West Indies desk officer at the State Department, said the Consulate was in a two-story wooden building less than 50 yards from the shore. He said the lower floor was used as an office and the upper as living quarters for the U.S. officials.

Commiss End Confab; Support K

MOSCOW (AP)—The Soviet Communist party ended its 22nd congress Tuesday night with endorsement of Premier Khrushchev's 20-year plan to transform the Soviet Union into the world's greatest industrial power with the world's highest standard of living. The resolution approved by the 4,400 wildly applauding delegates rang down the curtain on the eight-day session that also (1) underlined policy differences between Khrushchev and Communist China's leaders, (2) brought Albania near to expulsion from the Soviet bloc, (3) branded Stalin as a mass murderer and took his body out of the hallowed Lenin tomb on Red Square, and (4) completed the disgrace of V. M. Molotov, Georgi Malenkov and Lazar Kaganovich. Khrushchev, reelected to head the most powerful Communist party in the world, promised a horn of plenty under communism, which he described as "the most influential political force of our time."

UN Presses U.S. To Abandon Test

UNITED NATIONS, N.Y. (AP)—The United States was under mounting pressure in the United Nations today to call off tests for any new nuclear weapons plans as support grew for an appeal to the big powers to agree to a voluntary test moratorium. The appeal appeared certain of General Assembly approval. But the United States has served notice it may resume test explosions in the atmosphere to counter the Soviet tests. The U.S. delegation announced Tuesday it would vote against the moratorium appeal since it makes no provision for effective controls. A number of pro-Western states from Latin America and Scandinavia declared their support for the moratorium call sponsored by India and other nonaligned nations. They declared it was up to both sides to stop testing. Japan aimed a direct appeal at the Americans to call off any test plans. Chief delegate Katsuo Okazaki denounced the Soviet Union for triggering its 30-megaton bomb but declared, "another show of high statesmanship is now demanded of the United States." "We are aware of another danger, an endless chain of nuclear tests," Okazaki said. "Such a competition would also accelerate the armaments race and threaten the future of mankind." The United States anticipated several weeks ago that it would be put in a ticklish spot by the Indian-sponsored moratorium demand. U.S. delegate Arthur Dean accused the Russians of timing their tests so they could announce adherence to a moratorium after they finished testing. Prime Minister Harold Macmillan pledged Britain's support of any U.S. testing to maintain the nuclear balance of power between the West and the U.S.S.R. The other members of the North Atlantic Alliance are expected to go along, but it was most unlikely the Western powers could muster enough support to defeat the moratorium appeal. Elsewhere in the United Nations: Pakistan delegate Khwaja Sarwar Hasan proposed a world oil embargo on South Africa as a means of forcing South Africa to abandon its white supremacy policy.

Death-Ray Bomb Goal Of Blasts

NEW YORK (AP)—The immediate goal of the United States in any resumption of nuclear tests would be development of a fantastic neutron death-ray bomb, according to published reports. The New York Daily News quoted an unidentified Washington official as saying: "It's a safe assumption that we will be testing the neutron bomb very soon." The New York Journal-American reported it had learned the death-ray bomb "is the prime goal in the resumption of nuclear tests by the United States, and not another H-bomb." The neutron bomb was described as producing death without destruction by blasting out unseen, unfelt neutrons that could penetrate three feet of concrete. It could wipe out the populations of entire cities without major damage to the cities themselves. Essentially, the difference between neutrons and other types of radiation is that they penetrate man-made structures and kill animal and human life inside without leaving the building or nearby ground saturated with the casualty-producing contamination. There was no immediate comment from the White House, Pentagon and other sources in Washington on the report.

PAUL REVERE PANEL — A capacity crowd turned out at the Winema Wednesday morning to hear three visiting Congressmen discussing the shortcomings of the present administration. In this view of the head table, left to right, are Robert Davis, State Republican chairman; Rep. John Anderson, Illinois; Rep. Charles Goodell, New York; Ben Adair, County Central Committee chairman; State Representative Carroll Howe at microphone; Rep. Robert Griffin, Michigan, and State Representative George Flitcraft. Klamath Falls was the first stop in Oregon for the Paul Revere panel.

Panel Scores Lack Of Leadership; Calls Leaders 'New Deal Retreads'

By FLOYD L. WYNNE A militant note of constructive criticism of the current administration was struck by three Republican Congressmen, speaking at a capacity breakfast audience at the Winema Wednesday morning. All three Congressmen documented the fact that President John Kennedy had not lived up to the many promises, "220," as one Congressman listed them, made during his campaign, but, on the contrary, had done just the opposite in many instances. The individual talks dwelt on domestic affairs and their handling by the administration as well as foreign affairs. All pleaded for a firm, decisive leadership by the President, and stated that "the people are leading the President rather than the President leading the people." Speaking here on the first of a series of Oregon meetings were Representatives John B. Anderson, Illinois; Charles Goodell of New York, and Robert Griffin of Michigan. Rep. Griffin opened the discussion by saying, "We'll be criticized for daring to criticize the administration, but if there were no criticism, there would soon be dictatorship." He cited the words of the then-candidate John Kennedy when he replied to this charge of criticizing the administration during times of tension. "We all applauded President Kennedy on Jan. 20 when he asked us to sacrifice," Griffin said, "and since then some of us have sacrificed by being called back into service, but instead of moving forward, the administration expanded its cradle to the grave philosophy, and we have in reality been marching backward."

Legal Work For Hospital Authorized

Authorization to incorporate a hospital unit was announced by Rev. Robert Groves, chairman of the Presbyterian Hospital Committee, and pastor of First Presbyterian Church, The Klamath Falls law firm of Ganong & Ganong will proceed with the necessary legal action, Rev. Groves said. The Klamath County Chamber of Commerce hospital steering committee, headed by Dr. E. E. Howard, has been asked to submit a list of at least seven names as nominees to the 15-man board contemplated for the hospital, Groves said. Eight of the board members will come from the Presbyterian, he added. As soon as board members are named, they will elect officers, including a president, vice president, secretary and treasurer. Any member of the board can be elected to the officer positions, Reverend Groves explained. First Presbyterian Church here has undertaken completion of organizing a new hospital for the community, following a chamber of commerce study indicating that the need for improved and extended hospital facilities exists.

French Fire On Moslems

ALGIERS (AP)—French troops and police battled Moslem rioters across Algeria today, and a government spokesman reported about 30 Moslems had been killed and 60 wounded by noon. Moslems throughout the North African territory heeded a call from the rebel government in Tunis and took to the streets demanding independence on the seventh anniversary of the start of the bloody Algerian rebellion. The Moslems ignored orders from the French government to stay at home. The government spokesman gave no report of any European casualties. He said that seven Moslems were killed in Algiers and a score wounded.

Milk Men Quit Union

CINCINNATI, Ohio (AP)—Members of the independent Milk and Dairy Drivers Union have voted 1,664 to 12 to quit the Teamsters Union and join the AFL-CIO. The secret balloting Tuesday was supervised by the National Labor Relations Board. The voting followed a rebellion led by James T. Luken against the Teamsters led by James R. Hoffa.

Cohen Back In Prison

LOS ANGELES (UPI)—Dapper Mickey Cohen was back in jail today, this time on murder and conspiracy to murder charges returned in a secret grand jury indictment. Four other persons also were named in the indictment in connection with the fatal shooting of Jack (The Enforcer) Whalen in a Sherman Oaks, Calif., restaurant in 1959. The four were Sam Frank Loigno, 40, George Piscitelle, 30, Roger Leonard, 42, and Joe De Carlo, 37, former manager of Cohen's onetime fiancée, stripper Candy Barr, currently in prison in Texas on a narcotics charge. Leonard, in Philadelphia, filming the television program "Route 66," was arrested there Tuesday night. The writer and producer was arrested at University Hospital where he was visiting his wife, Blanche, who became ill earlier in the day. Loigno, arrested Tuesday on the charge, currently awaits retrial on the same charge. A judge set Nov. 14 for Loigno to enter a plea.

Orbit Try Fails As Scout Rocket Explodes In Air

CAPE CANAVERAL, Fla. (AP)—A Blue Scout rocket spiraled crazily out of control and exploded in flight today shortly after it was launched in an effort to orbit a satellite to test the worldwide U.S. man-in-space tracking program. The 75-foot projectile rose from its pad at 10:30 a.m. and it was apparent almost immediately something was wrong as the rocket lurched violently from side to side. The auto pilot system tried valiantly to put the Blue Scout on the proper course, but about 20 seconds after liftoff the vehicle spun out of control and blew apart. Pieces of the broken rocket tumbled back harmlessly to earth. There was no immediate word on what went wrong. The National Aeronautics and Space Administration announced that the rocket deviated from its planned path and was destroyed by the range safety officer. Despite the failure, an official reported it would not delay an attempt scheduled later this month to launch a chimpanzee into a three-times-around-the-world orbit. The chimp launching is the last scheduled Project Mercury flight before an astronaut is lofted in orbit, hopefully in December or January. Chris Kraft, Mercury flight director, said data which would have been gained from today's shot "was desirable but not mandatory." He added that presently there are no plans to repeat today's launching. Officials wanted to determine just how swiftly the farflung 18 stations in the tracking network can relay information from an orbiting object to the Mercury control center at Cape Canaveral. Speed is necessary if split-second decisions are to be made which could save a spaceman's life in case something goes wrong on manned flights.

W-H-O-O SAID THERE AREN'T spooks and spirits abroad. All Hallow's Eve, the night of Oct. 31. Anyone at home, on foot, in traffic last night, found Halloween treat or trick goblines, goblins, Indians and Japanese girls and fearful-faced unknowns traveling singly and in numbers about streets and country roads with eyes on doorbells and thoughts on all the goodies that small folks love. This year there was no chill wind nor snow on the ground and more children took part in the old tradition of celebrating Halloween than in many years. Left to right, at OTI, were Donnie Henderson, Debra Ann Cordial, Danny Henderson, with big cigar; Donna Woods, left, and brother "Wink," 390 Hillside, were treated by Mrs. Paul Landry, 331 Pacific Terrace; Roy Johnson, 1946 Manzanita, hid behind colored glasses and goatee; Bob Baggett, 4429 Shasta Way, had armfuls of babies with son, Mark, and daughter, Vicki, who had "scary" treat bags, and Gary Buchholz eyes "contribution" left at his home, 2340 Garden Avenue. Similar streamers festooned many trees and chimneys around town Wednesday morning.
