

**Church Refuses Contributions**

ABERDEEN, S. D. (AP)—A Methodist bishop is protesting the action of a South Dakota judge who recently ordered a group of game law violators to make contributions to their churches in lieu of paying fines.

The case involved pheasant hunters appearing before Judge Paul F. Burke at Miller, S. D.

"A church cannot properly use the power of a government agency to collect funds for its support," Bishop Edwin R. Garrison, Aberdeen, said Friday.

Bishop Garrison said he was advising church treasurers under his jurisdiction to return any such contributions.

**You Can Survive Atomic Attack**

(Editor's Note: A Nobel prize winner who is America's best known authority on fallout and radiation has written for this newspaper 15 vital articles on what you can do if nuclear war strikes. Here is the first.)

By PROF. WILLARD F. LIBBY

For \$30, I built a fallout shelter in my backyard.

It gives my family 100 times more chance of surviving nuclear fallout than if I had done nothing.

This poor man's shelter is just one example of many practical things you can do—and especially know about—for survival insurance if all efforts to keep peace fail.

The key to survival is understanding the hazards, the effects of nuclear weapons, so you can make intelligent decisions and take intelligent action.

The smart man has 100 times more chance than the man who doesn't know what to expect or to do.

Ignorance can kill, just as it kills the little child who runs in front of an automobile. You can save your life easily. You can easily lose it.

Do you know, for example, that: Even if a bomb exploded nearby, you would have an hour or longer to take or prepare shelter before the fallout arrived?

Forty-eight hours after radioactive fallout comes down, it is only 1 per cent as "hot" or dangerous as when it fell?

Fallout is one of the biggest potential killers in nuclear weapons? By this fallout, I don't mean the relatively small amount coming from high air bursts of nuclear tests. I mean the thousands of tons of radioactive dirt and materials vaporized and made radioactive by a great burst near or on the ground.

This fallout behaves like ordinary dust, except it is "hot."

**SHELTER** — Professor Libby is shown with his backyard fallout shelter which he constructed at a cost of \$30.

There are ways to clean up, brush or wash away this radioactive dust.

You could build a \$30,000 shelter, and yet allow fallout to get in unless you knew what you were doing.

Fallout will not mean the end of all life on earth, even if hundreds of bombs were exploded.

All these are facts. They and other facts answer "Yes" to the many questions people are asking, which all add up to this: "Is there really anything we can do?"

I cannot tell you there is a simple, cheap way to protect yourself if you are in the very center of a target when it receives a direct hit.

But millions of us will not be there.

And many thousands near the center of destruction could survive, with knowledge and protection.

**Your First Move**

First, let us assume you are caught in the most defenseless position—out in the open, with no warning an attack is coming.

The first sign is a tremendous light, thousands of times brighter than the sun or a flash of lightning. There's no mistaking what it is.

If you sense it, don't look at it. It could blind you.

Throw yourself instantly to the ground, and preferably behind some protection, such as a building, the curb of a street, a culvert, even a tree, anything to put

protection between you and that flash. Lie as flat as you can.

With the light, the first effect is prompt or instant radiation from the nuclear burst. It is X-rays and neutrons flying out in straight lines in all directions from the burst. This is not fallout. The X-rays and gamma rays travel about 1,000 yards at most, then disappear.

With this radiation, at the same speed comes heat. The heat from a 20 megaton bomb might cause second degree burns at a distance up to 25 miles, unless you were protected.

A hole in the ground could save you from much or all harm from the radiation and heat. Thousands of Japanese in Hiroshima or Nagasaki would have survived had they known this in time.

Then, travelling at the speed of sound, comes the blast effect, made all the worse because it picks up all kinds of objects and hurls them about like missiles.

Hiding, making yourself small, increases chance of survival. The chances improve the farther you happen to be from the bomb center.

Survive this, and you have probably an hour before fallout arrives.

Why? Because it consists of the nuclear ashes or coals from the burst, and sucked-up material. And it shoots up to 20 to 25 miles high, and has all that distance to fall back to earth.

**CUBAN ACTOR DIES**

MIAMI, Fla. (AP)—Federico Pineiro, a member of the Negro and Garrido comedy team that toured Latin America for 33 years, died Thursday.

Pineiro, who was 59, fled the Castro regime in May and had been appearing at a Miami theater with other Cuban stars at the time of his death.

**Trotsky's Widow Asks 'New Look'**

PARIS (AP)—Leon Trotsky's widow has written to Soviet authorities asking for a new look at Trotsky's trial and assassination in the light of denunciations of Stalin at the recent Soviet Communist party congress.

The letter, disclosed today by the international secretariat of the Fourth Internationale, said in part:

"I ask that you totally and publicly revise the Moscow trial in which the chief accused were Leon Trotsky and my son Leon Sedoff. I ask a complete and public investigation on the means employed by the GPU (Stalin's secret police) against Trotsky, on his assassination in Mexico, and on those who inspired and executed the crime."

Madame Trotsky also asked the whereabouts of another son, Sergei Sedoff, arrested in 1935.

The letter was addressed to the Presidium of the Supreme Soviet and the Central Committee of the Communist party.

Trotsky lost a power battle with Stalin in 1927 and fled to Turkey.

then to Mexico, but was always in danger from secret police security, and murdered him with an axe. His slayer was imprisoned and released in 1960.

**STOP COLD WINTER DRAFTS**

Cover Your Windows and Doors with

**Warp's FLEX-O-GLASS**

CRYSTAL CLEAR, SHATTERPROOF PLASTIC

ONLY **29¢** Lin. Ft. 36" wide also in 28" and 48" widths

Keeps Out Cold Holds In Heat Saves UP TO 40% On Fuel

Costs So Little . . . Anyone Can Afford It

Compare the low cost, light weight, convenience and weatherproof qualities of Warp's Flex-O-Glass with expensive, breakable glass.

So Easy . . . Anyone Can Do It

It takes only a few minutes to put up any of Warp's Shatterproof Window Materials. It's so easy that even the womenfolk enjoy doing it. Don't let cold weather catch you unprepared! Get Flex-O-Glass now!

WARP-O-GLASS, GLASS-O-NET, SCREEN-GLASS, FLEX-O-PANE, POLY-PANE & EASY-ON KITS are also made by Warp Bros., Chicago 51, Ill.

Get Flex-O-Glass at Your Hardware and Lumber Dealers

**POWERFUL NEW PLUNGER CLEARS CLOGGED TOILETS in a jiffy!**

**TOILETFLEX Toilet Plunger**

Ordinary plungers just don't seat properly. They permit compressed air and water to splash back. Thus you not only have a mess, but you lose the very pressure you need to clear the obstruction.

With "Toiletflex," expressly designed for toilets, no air or water can escape. The full pressure plows through the clogging mass and swishes it down. Can't miss!

• DOUBLE-SIZE CUP, DOUBLE-PRESSURE  
• DESIGNED TO FLEX AT ANY ANGLE  
• CENTERS ITSELF, CAN'T SKID AROUND  
• TAPERED TAIL GIVES AIR-TIGHT FIT

**Nuclear Sub Goes To Post**

PASCAGOULA, Miss. (AP)—The USS Snook, the Navy's 21st nuclear-powered submarine, will leave Pascagoula Monday for its first assignment with the Pacific Fleet.

The Navy said Friday the Snook will go first to Key West, Fla., to pick up supplies and then depart for San Diego, Calif., its new home port.

The 232-foot underwater craft probably will travel submerged during most of its 2,000-mile voyage to San Diego.

**Mothers...**

Mothers are around the house all the time because somebody has to cook and wash and all. They are smart ladies and they always know when you're eating too much or not enough. On Mother's Day they get presents and a year older.

Every day mothers read the newspaper so they can stay smart and find out what to buy and just because they like to. In the Klamath Basin mothers read the Herald and News more than anything else because they get more out of it.

Television repairmen, dentists and policemen do, too. In fact, most everyone does.

Herald and News
