

Nikita Admits Nuclear Blasts Harm To Health

MOSCOW (AP)—Soviet Premier Khrushchev told a cluster of newsmen at a reception that the Soviet Union will drop nuclear testing "when the others stop." Earlier today, he acknowledged that nuclear testing is harmful to health.

"We will stop when the others stop," Khrushchev said in answer to a question by correspondents. "If the West continues testing there will be more tests here."

This was a reflection of the Soviet device of blaming the West for beginning the testing of nuclear weapons, although actually the moratorium was broken by the Soviet Union.

To further questions at a party honoring the 44th anniversary of the Bolshevik Revolution, Khrushchev also said the Soviet Union does not want to hustle the West

YOU CAN SURVIVE ATOMIC ATTACK - 3

You Can Build A \$30 Fallout Shelter

By PROF. WILLARD F. LIBBY

My \$30 fallout shelter consists of a hole in a backyard hill, bags of dirt, and some railroad ties.

Anyone with a basement is lucky—he could build a shelter more easily, and perhaps more cheaply.

My costs were:

- Burlap bags \$11.00
- Nylon string and needle to sew bags 1.00
- Railroad ties 9.00
- Trucking in the ties 7.00
- Zinc chromate to treat burlap bags 2.00
- Total: \$30.00

I dug horizontally into the slope of the hill, and put the dirt in bags, using them to build walls five feet high on both sides to make an enclosure of about four by six feet.

Another wall in front, with an offset, provides a door. It's wide open. Radiation from fallout cannot go around corners—but people can get in or out.

Railroad ties are the roof beams, with a two-foot layer of dirt-filled bags resting on top. That gives 28 inches thickness of dirt and wood.

A corner of your basement would provide two ready-made walls with a few feet of dirt or sandbags piled up outside. Then build walls consisting of sandbags or concrete blocks 1 1/2 to two feet thick, again with an offset entrance.

The roof and upper stories of a house would keep much fallout

An offset protects shelters from fallout rays.

at a distance, but for sure safety the shelter needs a roof made of beams and blocks of concrete or dirt.

Even Books May Help

There is no limit to improvisations. Civil Defense offices can supply excellent plans.

The vital point is that lethal X-rays from intensive fallout are stopped by two feet of concrete, or anything with equal density or mass. Thus, it takes 10 feet of water or wood to do it, about two to three feet of dirt, but only two to three inches of lead.

However, lead is very expensive. A quick, life-saving emergency shelter could be fashioned by piling concrete blocks—or even stacks of books—on top and around a heavy table, placed in

in significant amounts through ordinary air circulation.

An essential item is a radiation meter. Unfortunately, effective ones still cost about \$23. It is needed to tell you if seeping dust is reaching dangerous levels. If so, sweep it out with a broom. Fallout eventually becomes ordinary dirt. But you must avoid or get rid of it while it is radioactive.

Try Sleeping Pills

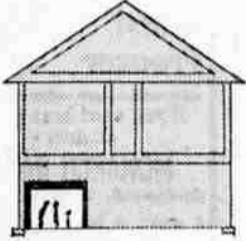

The man with the expensive shelter could unwittingly track radioactive dust into his shelter on trips in and out, and so concentrate dangerous amounts, unless he knew about this hazard. So everyone needs a broom as well as a meter.

You should plan to stay inside your shelter at least 48 hours. Suppose fallout descends an hour after the burst. In seven more hours, it is only 10 per cent as intense as it was when it first landed. And 49 hours after the burst, or 48 hours after landing, only one per cent of the initial radioactivity remains.

In the next 12 days, it declines to become only one-tenth of one per cent of the initial intensity. This is considered a safe level to permit moving about.

Forty eight hours in a small, cramped shelter or hole is no picnic.

You might well take sleeping pills to help wait out the most critical period of fallout danger.

Basement provides a good start for a shelter.

Washington Claims Lead In Power

OLYMPIA (AP)—Washington generated more than three times as much electric power as Oregon last year, the Washington Department of Conservation reports.

The agency said 36 million kilowatt hours, or 65 per cent of the total for the Pacific Northwest, were generated in Washington. Of that amount 4.3 million was turned out by private utilities.

Oregon generated 11.7 million kilowatt hours, or 21 per cent of the total, the agency said. The amount included 4.2 million kilowatt hours from private sources.

Idaho generated 9 per cent and Montana 5 per cent of the Pacific Northwest total of 55 million kilowatt hours.

The agency also released a comparison to show that electric rates charged by mutuals and cooperatives average 1.27 cents a kilowatt hour, rates of private utilities average 1.22 cents, public utility districts 1 cent, municipal utilities 96 mills and irrigation districts 75 mills.

Truman P. Price, supervisor of power resources, said the main reason cooperatives charge relatively high rates is that they serve mostly rural areas with high distribution costs.

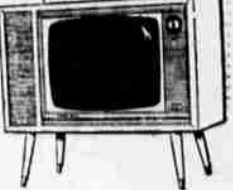

The lowest charge in a comparison of typical electric bills for 1,000 kilowatt hours a month was \$6.40 at Coulee Dam.

On the same basis, Lakeview Light & Power ranked lowest among cooperatives and mutuals at \$7.87 a month. Cowlitz county among public utility districts at \$8.10 and Puget Sound Power and Light Co. among private utilities at \$10.28.

Today, half the edible peanut crop in the United States is made into peanut butter.

OVERSTOCK TV SALE!

\$100.00 FOR YOUR OLD TV

ON ANY NEW 23" ADMIRAL

Yes, we over bought and have too many 23" TV sets. Your present working TV set is worth \$100.00 when you trade on a new Admiral. Prices start as low as \$329.00... now \$229.95 with your trade. See the exciting new styles and finishes. Save \$100.00. Trade Now!

FALL-OUT FREEDOM

Grandma had to heat with fire, but you don't!

Join most other moderns and put a flameless, fumeless, foolproof electric heating system in your home.

Eliminate soot, smoke, fumes and all other messy flame by-products.

Live in the sunshine-clean warmth that only an electric heating system can bring.

Talk to your favorite Cal/Ore Electrical League wiring or heating contractor. Find out how you can install a truly modern electric heating system in your home without down-payment and for as little as \$10 a month!

Nazi Murder Charge Dropped

MUNICH, Germany (AP)—Charges of murdering Nazi soldiers in occupied Yugoslavia were dropped today against ex-partisan Lazo Vracaric. The West German government apologized for his arrest on a 1941 warrant.

Officials returned Vracaric's Yugoslav passport and told him the case against him has been wiped off the books. His arrest here last Tuesday while on a business trip had brought a wave of protests from officials and veterans groups abroad, particularly from countries that were occupied by the Nazis.

Pilots Set Strike Date

CHICAGO (UPI)—The Air Line Pilots Association today set a strike deadline against Pan American Airways for Friday night.

In a telegram to the airline, the ALPA said PAA pilots would walk off their jobs at 11:59 p.m. local time Friday night to back contract demands.

The ALPA said it would arrange with the company to operate all "essential military or public interest flights."

PAA employs about 1,400 pilots and is the United States' largest international carrier, flying from 12 U.S. cities to 53 countries and U.S. territories.

C. N. Sayen, ALPA president, said the action was being "taken reluctantly by the PAA pilots because failure of the prolonged negotiations, mediation and fact-finding left them no other alternative under law."

The ALPA, Sayen said, had exhausted all procedures during the past 17 months under the Railway Labor Act and "no agreement of substances has been reached on rules, working conditions, and pay proposals... and no further negotiations have been scheduled."

Among the important unresolved issues, he said, are the establishment of maximum limitations on monthly flying hours, more orderly scheduling procedures, and limitations on flight deck and total duty time during a 24-hour period.

Gypsies Bury Tribal Chief

PORTLAND (AP)—A procession of some 200 Gypsies followed a band to the graveside in Rose City Cemetery Monday as John Stevens, 67, was buried.

The traditional sprinkling of water along the path and audible wailing marked the approach to the grave where the casket was opened and coins dropped in.
