Museum Displays Models Of Da Vinci Inventions

daily effect upon our lives were developed by an Italian named Leonardo da Vinci.

artist who painted the "Mona 'Lisa" and the "Last Supper." His less familiar side, as the drawn under the Milk Stabilizations of the platen, and an air-conditioning cooling. He designed a double-time the platen, and an air-conditioning cooling. He designed a double-time transfer of the platen, and an air-conditioning cooling. He designed a double-time transfer of the world time to the platen, and an air-conditioning cooling. He designed a double-time transfer of the platen, and an air-conditioning cooling. He designed a double-time transfer of the platen, and an air-conditioning cooling. He designed a double-time transfer of the platen, and an air-conditioning cooling. He designed a double-time transfer of the platent air-conditioning cooling. He designed a double-time transfer of the platent air-conditioning cooling. He designed a double-time transfer of the platent air-conditioning cooling. He designed a double-time transfer of the platent air-conditioning cooling. He designed a double-time transfer of the platent air-conditioning cooling. He designed a double-time transfer of the platent air-conditioning cooling. He designed to the platent air-conditioning cooling air-conditioning cooling transfer of the platent air-condition air-conditioning cooling transfer of the platent air-condition air-con thost prolific inventor the world has ever seen, is presented in a series of 35 models made from his scientific drawings, on exhibit at the Oregon Museura of Science and Industry in Portland from 5an. 7 to 29.

The models were constructed by A milk usage audit law, a septwo huge wings. A series of ventions of the farmers below huge wings. The platen, and an air-conditioning unit all saw everyday use. The most spectacular invention of all, an ornithopter or flying were damaged machine, may have been built and tried out, but presumably not with the Wright brothers' success. It Short pointed out that the grade on a wooden frame study at lirst-hand the unique interests of the farmers below.

The models were constructed by Dr. Roberto Guatelli, a da Vinci authority, after years of study and research. Their exhibition is sponsored by International Business Machines Corp. which acquired them in 1951.

Some of these machines actually were used with success in care in the study and the unique in two huge wings, a series of two huge wings, a series of two huge wings, a series of the famous Italian ropes and pulleys and a wind-lass. Lying in the frame, his feet in leather stirrops connected by pulleys with the wings, the flyer moved his feet up and down to flap the wings. At the same time, Heller, a member of the United the operated the windlass with Press International editorial staff that the grade conxisted of a wooden frame, study at first-hand the unique in ventious of the famous Italian.
