There's No Business Like Shmo Business !!

There's been a lot of confusion lately about the words "shmo" and "Shmo". Many think they mean the same thing. Nothing could be further from the truth !!

A shmo is a small animal which, when boiled, tastes like chicken, but when broiled comes out steak. Its whiskers make the finest quality tooth-picks, and its eyes make superb shoe buttons. It lays any flavor of cake, but only Grade A milk. It is to be found nowhere. And that's what a Shmo is.

Now, a Shmo is something different. It is to be found in Outer Shmongolia, generally sleeping. (More tomorrow—)
