

Biology Students Work At 'Own Speed' In Dunsmuir School

DUNSMUIR — Students taking an arrangement proving highly satisfactory according to Dunsmuir High School are "on their own" in biology II at Dunsmuir Joint Union High School.

EXPERIMENTAL COURSE — An arrangement to allow selected students to study at their own speed without supervision is being successfully conducted at Dunsmuir Joint Union High School. Studying the structure of mammals in the special biology II class are, from left, Bob Vaughn, Bob Baldo, Sandra Reynolds, and Joan Bisagne.

Income Tax Drives Accountant Crazy

CHEYENNE, Wyo. (UPI) — An accountant who went berserk while making out his income tax return was captured today by police in a four-hour duel with gunshot and tear gas.

The power company accountant, Dennis Clinton Rice, 21, wounded three police officers before a courageous patrolman, Mike Co-

biology class. It enables serious students to study at their own speed and work along special interest lines, without the distractions of having less interested persons in the class.

Progress is checked from time to time through quizzes and class discussion but Ramey Drake, class instructor, explains this is not just another lab class in biology.

"The students plan to continue science courses at the college level and the class is designed to prepare them for advanced methods of science study," Drake states.

At present the eight juniors and seniors taking biology II are classifying mammals according to skull structure, and each student is working on an independent project.

While the course follows standard subject matter, emphasis is placed on local animal and plant life, Drake explains. The students are encouraged to identify the biological life as it exists in their immediate surroundings.

The study of algae and fungi under the microscope will be done with specimens collected by the students. "We have to wait for warm weather for this phase of the course," Drake said.

Because the course is an elective offered to college preparatory students, Drake has been given the privilege of restricting the enrollment. Only those students with no grade less than a B are recommended and none are eligible that have grades below C.

Here's what Mrs. Dean Mason of Klamath Falls says about electric living . . .

"Electricity helped us build our home, and now it helps us live a wonderful, comfortable life"

"Electric power tools made building our new home easier and helped us do the job the way we wanted. Naturally, we included all the latest electric conveniences from a dishwasher to outdoor lighting. All-electric living is really a blessing when you have a growing family. I count on electric helpers for cooking, washing, water heating and nearly every household job there is. It's the hardest-working service I know of and is certainly our biggest value."

Thousands of other Pacific Power & Light customers, like Mrs. Mason and her family, live better because they make generous and effective use of modern electric service.

The Mason family certainly keeps me running full time!
