

Reds Tighten Control Of Movies

MOSCOW (UPI)—The Soviet government announced Saturday the formation of a state committee for cinematography apparently intended to tighten ideological control over the film industry.

The formation of the new committee was the latest evidence of a tightening-up in the world of arts and letters. It followed a series of meetings to approve the tougher ideological line which Premier Nikita S. Khrushchev laid down March 8.

Alexei Romanov, considered by Western observers a professional ideologist, was appointed to head the committee.

Romanov recently has held the post of first deputy chief of the ideological department of the powerful Central Committee of the Communist Party. He is also an alternate member of the Central Committee.

Heaviest single item ever shipped over an American railroad was a 98-foot refinery vessel early in October 1962. The piece had a gross weight on rails of 1,079,200 pounds.
