Five Clubs Show Aces

By OSWALD JACOBY

Newspaper Enterprise Assn.

As the years have gone by, experts have refined and improved the Blackwood convention to the point of absurdity in some cases. Other refinements have been so good that Easley Blackwood has adopted them, if he didn't actually suggest them himself.

The first such refinement is to use the five club response to a Blackwood four-no-trump to show either no aces or four aces. The theory is that the Blackwood bidder will always be able to tell which one it is and will be able to ask for kings if he wishes. If the five no-trump response is used to show four aces there is no way to do this.

Of course, it is rare indeed when a player uses Blackwood with no aces and still needs to ask four aces, but it does come up and it costs nothing to be prepared.

North's jump to four spades may strike some of you as a trifle on the conservative side, but it made it very easy for South to get to the grand slam since he was able to mark North with all five important cards.

It is worthy of note that South eventually bid seven no-trump. He could count 13 tricks in no-trump as well as in spades and there was no chance to have the opening lead ruffed at no-trump.

You'll have all the latest information with your copy of "Win at Bridge With Oswald Jacoby." Just send your name, address, and 50 cents to: Oswald Jacoby Reader Service, care this newspaper, P.O. Box 409, Dept. A, Radio City Station, New York 19, N.Y.

26 CARD Sense

Q—The bidding has been:

South	West	North	East
1♠	Pass	1♥	Pass
2NT	Pass	3♠	Pass

You, South, hold:
▲AQ65♥K32♦AQ2▲A65

What do you do?

A—Bid four spades only. This will show that you hold four spades, but if your partner can't find a further bid you don't want to be in a slam.

TODAY'S QUESTION

Instead of responding one diamond to your opening club you partner has responded one spade. What do you do now?

Answer Tomorrow

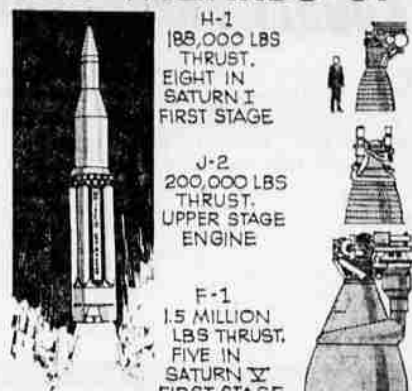

Tailors Irked By Macmillan

TOKYO (UPI)—Communist China's English-language Peking Review took note today that British Prime Minister Harold Macmillan's troubles include criticism from the tailoring industry.

The Peking Review said London's Saville Row resents Macmillan because "he always wears the same suit and has even been known to wear patched pants."

THE WIZARDS OF SPACE (13)

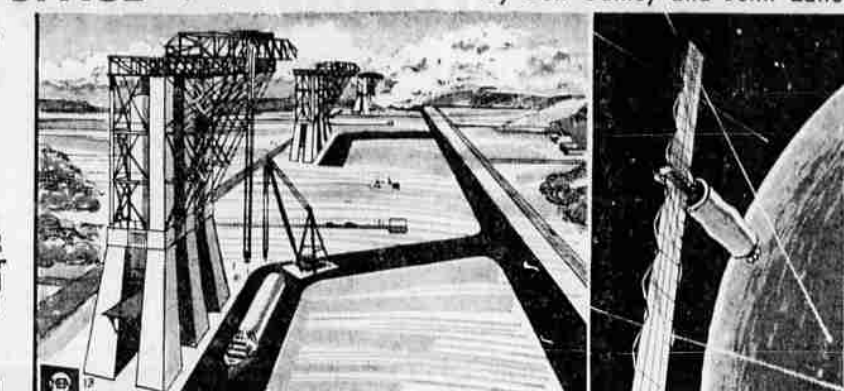

By Don Oakley and John Lane

America's largest rockets (and as far as we know the world's largest) are designed and manufactured, fittingly enough, at the largest facility operated by NASA.

This is the George C. Marshall Space Flight Center, which covers 1,600 acres on the Redstone Arsenal reservation near Huntsville, Ala. Directed by Werner von Braun, former German V-2 rocket maker, a force of more than 7,000 persons works in nine laboratories on a variety of problems. Marshall spends more than any other center: Its 1962 budget was more than \$800 million; this year it will handle contracts of over \$1 billion.

Best known and most glamorous of Marshall's projects is the giant Saturn booster, which will

carry the Apollo astronauts to the moon. Actually, there will be three Saturns:

First is Saturn I, the first stage of which has been successfully launched three times. It will place the Apollo capsule carrying three men into earth orbit for up to two weeks.

Five times more powerful is the Saturn V, whose huge F-1 engines will start the three Apollo astronauts on the way to the moon.

Between these two is a hybrid model, Saturn IB, consisting of the first stage of Saturn I and third stage of Saturn V. It will be used in early development and training phases of the Apollo project. Same size as Saturn I, it will use the powerful J-2 engine as its upper stage.

Eventually, production models of the Saturns

will be manufactured at the Michoud Plant near New Orleans, La. From there, barges will carry them 50 miles to the \$93 million Mississippi Test Facility now under construction (second panel). Finally, barges will transport the boosters to Cape Canaveral for launching.

Another program under Marshall's management is a huge meteorite detection satellite, which will be orbited late in 1964 by a Saturn I. In space, the satellite will deploy two large flat wings with an area of more than 2,000 square feet and record meteorite hits.

The eroding effects of these dustlike particles is one of the questions that must be answered before men can roam at will in space.

Ringling Of Bells July Fourth Urged By Colonists

The people of the Klamath Basin are urged to take part in the nationwide ringing of "Freedom Bells" at noon on July 4 by the Daughters of American Colonists.

In announcing the hope that church, school, business firm or individual who has a bell or has access to a bell will cooperate, Mrs. Guy Barton, chairman of National Defense and Mrs. Charles K. Wells, regent of Klamath Chapter of the DAC, ask everyone to "Ring For Freedom" on the stroke of 12 noon and to ring for four minutes.

The idea is to "stimulate renewed appreciation of the significance of our nation's birthday, to bring to our hearts, our ears, our minds, a definite unified reminder of our patriotism and honor to our Liberty Bell."

Such a resolution was presented to the National Assembly in Washington, D.C., by the state of Oregon.

Mrs. Wells and Mrs. Roland E. Wright, chairman of historical markers for the Daughters of American Colonists, also announce plans for the placing of a historical marker in Klamath Memorial Park in remembrance of Martin R. Fraim, a pioneer fur trader, who arrived in Oregon Territory April 30, 1857, crossing Link River and camping under a nearby ledge.

The 10:30 a.m. ceremony will be across from Payne Alley on Main Street, Oct. 12.

Henley Boy Wins Award

A Henley High School student has been named a winner in Time magazine's 27th annual Current Affairs Contest given this year to more than 400,000 college and high school students in the U.S. and Canada.

Six other Henley students received commendation from the magazine for their high scores in the contest.

Stephen Reiling, Route 2, Box 550, was one of the top scorers in answering 105 test questions on national and foreign affairs. He received a certificate from the weekly news magazine and a choice of either a world globe or a book from a specially selected list.

Other categories included in the test were business, sports, entertainment, science, religion, literature, journalism, education and the arts.

Other high scorers were John G. Mitchell, Lila Ritter, Leo Huff, Janet Lyon, Dick Houck and Joe Kerns.
