Convention A Check

By OSWALD JACOBY

Newspaper Enterprise Assn.

There is one major difference between the experts use of Blackwood and the average player's. The average player feels that he must use Blackwood to bid a slam. The expert only uses the convention as a final check after he has decided to bid a slam and wants to make sure he has enough aces.

Thus an expert never uses Blackwood when he is void in a suit and never when he has a worthless doubleton in an unbid suit or in a suit bid by his opponents.

Thus a great many players would use Blackwood with the North hand after their partner's one spade response to the opening club bid. No expert would. The expert would reason that if partner showed one ace he wouldn't be sure that he could make six, that if partner showed two aces he wouldn't know about seven, and that even if partner showed no aces six might be cold.

Instead, the expert would probably make the bid shown in the box and jump right to six spades. He would reason that if his partner held two aces and the king of spades he would bid seven and he would reason further that in respect of what his partner held there would be a good play to make six.

This time South makes six against an ace of diamonds opening and seven against any other lead. But even if South did not hold the king of diamonds he might make the hand. West might open a heart or even a club or a spade whereupon South would romp home with a grand slam.

A—Bid four spades. You have 12 points and very good spades, but your distribution is 4-3-3-3.
