

Florida's Governor Hits Accommodations Bill

WASHINGTON (UPI) — An other Southern governor, Florida's Gov. Farris Bryant, took his turn today in criticizing President Kennedy's proposed public accommodations law in congressional testimony.

Bryant was called before the Senate Commerce Committee (9:15 a.m. EDT) to testify on his opposition to the proposal to ban discrimination in hotels, restaurants and other facilities open to the public.

The Senate group already has

U.S. Sends Aid Ship

WIESBADEN, Germany (UPI) — The U.S. Air Force Saturday sent a mercy-mission C130 transport loaded with medical supplies and blankets to earthquake-stricken Skopje at the request of the Yugoslav government.

In Hyannis Port, Mass., it was announced that President Kennedy had sent a message to President Tito of Yugoslavia "expressing the sorrow of the American people over the tragedy and offering assistance in this disaster."

Moon Quest Not Race With Russians, Says New Project Chief

LOS ANGELES (UPI) — The new chief of the U.S. program to land astronauts on the moon before 1970 said today he does not like to think of the task of being "a race with the Russians."

"I don't think our main motive should be trying to get to the moon first," said Dr. George E. Mueller, who will head what is perhaps the most ambitious research and engineering enterprise ever undertaken by man.

"Naturally I think the United States should be pre-eminent in space, and I think we can. But I don't regard getting to the moon as a race."

"I think we must have an ordered, sound and well conceived program," said the bespectacled 45-year-old space executive who has had 23 years experience in missile guidance, deep space communications, microwave design. "We must think primarily of doing the best job we can."

Mueller, vice president for research and development at Space Technology Laboratories, Los Angeles, acknowledged that "of

look at a problem and get a grasp of what's involved. He has striking powers of appraisal."

Dr. Mueller is an expert in the Defense Department's Atlas, Titan, Minuteman and Thor missile programs and the National Aeronautics and Space Administration's Pioneer and Explorer space projects.

He is married to Maude Mueller and they have two daughters, Karen, 19, an exchange student in Germany, and Jean Elizabeth, 16, a high school senior.

The new Apollo project director studied electrical engineering and physics at Purdue, Ohio State and Princeton universities. He foresees no technological problems to landing a team of American astronauts on the moon by the end of this decade and bringing them back alive.

"I consider getting to the moon a single victory. I think we should look to the over-all conquest of space."

Spokesmen for five state commissions — California, New York, Minnesota, Missouri and New Jersey — also were to be heard by the Senate Labor subcommittee on the FEPC bill.

Chairman Adam Clayton Powell, D-N.Y., of the House Education and Labor Committee threatened Sunday to bolt congressional leadership and force a House vote on the FEPC issue.

Powell, a Negro, told a New York civil rights rally that "no white man anymore is going to tell me what I should do in the field of civil rights." He called on Negroes to "blindly follow black leadership" and not question leaders of the integration movement.

BOMB STOPS TRAFFIC

COMO, Italy (UPI) — Rail traffic between Milan and the Swiss frontier was interrupted for six hours Sunday when a bomb exploded and toppled a power line. There was no explanation for the blast.

SMALL CONSOLATION

DAGENHAM, England (UPI) — John Cross received \$208.14 last weekend from the Ford Motor Co. as a bonus for an idea which helped eliminate four screws used on auto glove compartments.

He was fired by the firm earlier this year.
