

42 Beheaded By Bandits

BOGOTA, Colombia (UPI)—Machete-wielding bandits beheaded 42 persons Monday in assaults on four vehicles on a highway about 60 miles northwest of Bogota, according to an army announcement.

The announcement said the bandits stopped a bus and three government dump trucks at a point on the highway between the towns of La Dorada and Victoria in eastern Caldas State.

The occupants of the vehicles were forced into a small house near the highway, robbed and beheaded one at a time, the army said. The victims reportedly were public works department laborers and peasants on their way to market.

The incident occurred in an area where bandits have massacred thousands of persons in recent years despite army efforts to maintain order.

Mrs. Benefiel

Death Reported

LAKEVIEW—Word has been received by her many friends here of the death on July 12 at St. Helena, Calif., of Mrs. Evrena May Benefiel, former resident of this area for many years. On July 29 she would have been 99 years old.

She was born July 29, 1864, in Iowa, and on March 20, 1887, she was married at Ashland to James T. Benefiel. Four sons and a daughter were born to the couple, Edwin, Fred and Leon Benefiel and Iva Loftus, all of whom preceded her in death; and James Benefiel, who lives at Foresthill, Calif. Her husband died six weeks before the youngest son was born and she operated a farm to support her family. Seven years later she married her husband's brother, the late Robert Benefiel.

She is also survived by eight grandchildren, Erma Johnson, Millie Royster, and Bob Loftus of Del Mar, Calif.; Dorothy Johnson and May Sieberts of Klamath Falls; Becky Jaska of Lakeview, and Linda Benefiel of San Leandro, Calif.; and by 13 great-grandchildren, and four great-great-grandchildren.

David Rose, musical director of "The Red Skelton Hour," is a charter member of the Live Steamers Club, a national miniature-railroad group.

NASA Sets Twin Shot

WASHINGTON (UPI)—The space agency said today it will try to launch two satellites with one rocket late this year to measure the effect of incoming radiation on the earth's atmosphere.

The satellites will be launched into near-polar orbits by a three-stage solid-fuel Scout rocket from the Pacific Coast missile range.

The National Aeronautics and Space Administration (NASA) said:

"It will be the first attempt to measure air densities by a polar orbiting satellite."

"It will be the first attempt to use Scout to place two satellites into orbit at the same time."

The military has staged multiple single-shot launches before but with different rockets for different purposes.

One of the spacecraft in the Scout launch will be a radiation-measuring payload provided by the State University of Iowa.

The other will be a 12-foot polka dot sphere, inflated in space, which will measure air densities at orbital altitudes. The polka dots are special materials designed to control the sphere's temperature. Scientists have evidence that particle radiation from space heats the upper atmosphere, causing it on occasion to rise to higher altitudes than it would otherwise reach.

Hunting Party Off To Alaska

BONANZA — A hunting party left Bonanza the morning of Aug. 3 for a month in Alaska hunting grizzly bear, moose, caribou and dog sheep.

In the party were Henry Vaden, 81, Klamath Falls, Ralph Vaden and Bill Noble of Langell Valley and Cecil Haley, Ivan Bold and son Gary of Bonanza.

They will drive to White River, Alaska, then charter a plane and fly to North Way where Ralph Vaden's brother, Doug Vaden, owns a hunting lodge. They expect to return home about Sept. 6.

He paused and said simply: "I just want to say thanks."

Normandy-Bound

About 100 persons lined the streets of Southwick—practically the entire population of the village.

More than 2,000 others gathered to cheer him in Portsmouth where he called on the lord mayor.

The throng delayed his departure 40 minutes. Then Eisenhower—almost as he did nearly 20 years ago—stepped aboard a sleek British frigate.

The chameleon is noted for the distance it can eject its tongue, which is as long as its body.

Southwick House is now a wardroom for officers at the British Navy's Air Direction School.

"The map used to be in the other room which is now used

as a dining room, but it still brings back memories," Eisenhower said.

He praised the local residents, many of whom shared the top secret information that the invasion was imminent, for their cooperation.

"I could never have performed my task without your cooperation and tolerance," Eisenhower said.

"Through your tolerance the secrecy of the D-Day headquarters was maintained."

He paused and said simply: "I just want to say thanks."
