Writer Of Western Tales Very Popular In Germany

FRANKFURT, Germany (UPI)—
The Western hero gallops his
white stallion into the band of
Indians, raises his right hand and
says: "Wie geht's?"
"Gut," replies the Indian chief,
America's Wild West goes to
Germany's seemingly endless
love affair with the Old Frontier.

Despite the necessity of trans-
lating the grunted "How" to a
guttural "Wie geht's," "Good"
to "Gut" and so on, the Ger-
manic passion for the Wild West
lives on, mostly because of Karl
May.

May (rhymes with the pronoun
"my") was Germany's Zane
Grey.
Scientist Albert Einstein and
dictator Adolf Hitler (who kept
a shelf of May's books in his
office) both doted on the Wild
West yarns spun out by May, who
wrote of a place he had never seen.

At Bad Segeberg, German movie
makers produce their own
Westerns. Every summer at the
North German town is a two-
month-long Karl May Festival in
a 10,000-seat theatre.

There the bad guys slug down
red eye schnapps in the Letzte
Gelegenheit Stube (Last Chance
Saloon). At Munich, the National
Karl May Wild West Club is
celebrating its 50th anniversary
and marking the 51st anniversary
of May's death. Frankfurt has
three stores selling nothing but
Cowboy boots and Western
clothes.

Even the Communists in East
Germany maintain a Karl May
Museum. Karl Marx never rivaled
Karl May in German hearts.
Children from Berlin to Bavaria
are not savvy about the Long
Ranger, Tonto, Tom Mix or Buf-
falo Bill. But they all know
May's intrepid hero of the Cactus
belt, Alte Schatterhand (old Shat-
terhand), and his Indian sidekick,
Winnetou.

Old Shatterhand shunned blood-
shed in the millions of May books
sold here. Shatterhand got his
name by flattening the bad guys
with one blow of his shattering
right hand.
May also peopled his plains
with such characters as Old Fire-
hand, the fastest gun in the
Teutonic West, and Without-Ears,
a hunter who had a closer-than-
usual shave with an Indian scalp-

Trial Balloons Vary In Size, Shape

By DICK WEST
United Press International

WASHINGTON (UPI)—In
politics, it is important to be
able to distinguish between a
trial balloon and a lead balloon.
Many a politician has turned
loose what he thought was a trial
balloon only to have it drop on
his foot and fracture a couple of
tootsies.

Others have been known to
rupture their lungs trying to blow
air into the uninflatable variety.

Despite such hazards, however,
it appears that we are in for a
rather active balloon season dur-
ing the next few months. The
1964 national conventions are still
about a year away and already
a couple of exploratory gasbags
have appeared on the horizon.

When last seen they were los-
ing altitude fast. Apparently the
launchers were unable to get all
the lead out.

Trial balloons have one thing
in common — a certain amount
of flatulence. Beyond that they
may vary widely in shape and
size.

Possibly there are a number
of children, and maybe a few
underprivileged adults, who
have never seen a trial balloon.

For their benefit, and for others
who may need a refresher course
in trial balloon recognition, I
shall undertake to list the identi-
fying features of some of the
more familiar types.

"Friends of Sen. Lungbaster
are quietly working behind the
scenes in an effort to obtain the
presidential nomination for him
next year."

The key word there, the one
that stamps it as the work of a
trial balloonist, is "quietly."

If his friends thought that
Lungbaster really had a chance,
they already would have hired
a brass band.

Should this balloon produce any
sort of reaction other than hyster-
ical laughter, a second one
will be sent aloft.

"Some of the prospective candi-
dates for next year's presidential
nomination are quietly working
behind the scenes in a 'Stop
Lungbaster' maneuver."

A balloon of that sort gets its
lift from the fact that the person
being stopped actually has never
started. It presages the launch-
ing of still another type.

"Sen. Lungbaster had quietly
