

## Road Work Given Okay

The grading and base surfacing of 1.4 miles of road on the Seven Mile Creek-Rocky Point section on the West Side Highway was one of four projects approved Thursday by the State Highway Commission as part of road construction authorized on the county-federal aid secondary highway system for the 1964 fiscal year.

The total funds set aside for the road work amounted to \$891,000.

The other three projects are in Jackson, Jefferson and Sherman counties.

In the Jackson County project some 13 miles of paving will be laid along the Crater Lake Highway on the Cobblestone Road section of the Butte Falls Road. The road way is to be rebuilt and base rock placed by the county.

The Jefferson County project is for the surfacing and oiling of two miles of the Cove section on the Grandview Loop Road.

In the remaining project, 6.6 miles of the Scott Canyon-Wasco section of the Wasco-Rufus County Road is to be surfaced and oiled.

## Accidents Cost KF Residents Over \$1 Million Each Year

Traffic accidents occurring to Klamath Falls residents cost the community about \$1,100,000 each year, according to a report by the National Safety Council.

The council noted that an average of six Klamath Falls residents die each year in traffic accidents, both in and out of the city.

The \$1,100,000 figure was based on statistics over the past three years and includes loss of earning power, medical and hospital expenses, cost of motor vehicle repair or replacement, and the overhead cost of insurance.

The figures were incorporated in an annual traffic inventory of the city conducted by the Safety Council.

The inventory gave the city an overall efficiency rating of 57 per cent for its traffic safety program in 1962. This was compared with a rating of 63 per cent in 1961, but Chief of Police Charles Howard, in commenting on the report, said the figures do not give a true picture of the effectiveness of the local program.

He said some of the figures presented are misleading, while others are in error.

The inventory noted that the "strongest area of your program" is traffic court.

Traffic court achieved a 79 per cent effectiveness rating, as compared to an 83 per cent rating in 1961.

The inventory commended the local Traffic Safety Committee, made up of representatives from various agencies, saying it is "well constituted to assume the responsibility of coordinating and reinforcing the individual activities of the various departments."

The Safety Council, however, suggested that a statement of "coordinating objectives" be established.

The report also commented on the Traffic Safety Council, made up of local volunteer workers. It said the effectiveness of the local council could be increased by (1) operating under formal by-laws; (2) adopting a written statement of General Operating Policies; (3) conducting an annual leadership review, evaluation and measurement of progress; (4) securing public recognition for work done by officials and that local traffic conferences be considered.

It was noted in the report that one person died in traffic inside the city in 1962, a drop of one from the three-year average of two fatalities.

This fatality rate was 5.9 per 100,000 population or 0.5 per 10,000 per 100,000 population. The national rate of fatalities per 10,000 registered vehicles was 1.6, compared to Klamath Falls' rate of 0.8.

Klamath Falls reported 61 non-fatal injury accidents in 1962, 15 below the average reported for the preceding three years.

The balloon's 225-pound instrument payload was automatically parachuted to earth and recovered by scientists.

**BIG BALLOON BURSTS**

PALESTINE, Tex. (UPI)—Massachusetts Institute of Technology scientists attempted today to determine what caused a huge balloon carrying instruments to study cosmic rays to burst at 107,000 feet.

The balloon's 225-pound instrument payload was automatically parachuted to earth and recovered by scientists.

**Races Pellets**

WINCHCOMBE, England (UPI)—Barrie Baxter likes peace and quiet in the neighborhood around his country home. A midnight auto rally interrupted his slumber.

A magistrate fined Baxter \$16.00 Friday for firing his shotgun at a car in the rally. He explained he only wanted to stop the car and find out who the driver was.

Hotpoint Dish Washer

- FREE YOURSELF from DISHWASHING
- Easy Rolling Casters
  - Vinyl Cushioned Interior
  - Quick Loading Racks

LABOR DAY ONLY **\$168**

## LITTLE PEOPLE'S PUZZLE

## Started Late

MADRID, Spain (UPI)—Lea Meriwether, 101-year-old St. Louis, Mo., resident visited Madrid today on his European tour.

"I never drank, I never smoked, and I never went with women until I was 14 years old," he told a Spanish reporter who asked him for the key to a long life.

Meriwether is a widower who outlived his three children.
