

Shasta Ski Bowl Reports Better Financial Picture

DUNSMUIR—A net profit of \$25,691 for the 1962-63 season presented a hopeful financial picture Monday night at the annual stockholders meeting of the Mt. Shasta Ski Bowl Corporation. This improved outlook is contrasted sharply to the last meeting when devaluation of their investments to save the corporation from possible bankruptcy.

Tom Flanagan, corporation accountant, described this year's figures as "exceedingly good" as compared to last year's loss of \$65,000. This past season is the first year the winter sports facility on Mt. Shasta has shown a profit in its five years of operation, Flanagan noted.

The improved financial outlook was attributed to excellent early snow conditions on Mt. Shasta, while other ski areas in California had bare ground, encouragement of repeat business and improved management.

Sales income from operation of bowl facilities such as the lifts and tows, food and drinks, rentals, and ski equipment totaled \$221,850 last year, Flanagan reported. This was a 79 per cent increase over last year. Operating expenses were \$137,000, down \$1,300 from the previous year.

Flanagan valued the fixed assets of the corporation as \$629,000 and said current liabilities were at an all time low of \$31,000. This latter figure includes property taxes and interest not yet due and accounts payable. Outstanding accounts total \$22,450 as compared to \$56,000 last year. The corporation's long term liabilities include \$46,000 outstanding in loans made by corporation directors during the lean years.

Robert Eller, chairman of the board of directors, reported that Bob Vaughn, general manager of the bowl last season, has indicated he will return for the coming season.

Stockholders will soon get receipts showing the number of shares they now own, Eller stated, but all of the new issue of stock in the corporation reorganization will be held in escrow in the Bank of America in Dunsmuir until the corporation proves its stability another year. This has been stipulated by the California corporation commissioner as a protective measure for investors, Eller explained.

Carl McConnell, Redding contractor, is the bowl's principal stockholder. He was issued stock in the reorganization move last summer to retire the corporation's indebtedness to him for the steel and glass lodge.

The number of directors was reduced from 17 to nine by vote of the stockholders, and those elected for the coming year were Paul Alcouffe, Pete Belcastro, Robert Eller, Vincent Galletti, Al Den James, J. Morgan Jones, Elmer Kennedy, Carl McConnell and James Mallory.

O. G. Steele, Yreka, was elected an honorary director for his interest in developing a more dependable water supply at the bowl.

The discontinuance of summer operation of the bowl was explained by the directors as too little income compared with costs. Operating the lift in summer subjects it to wind and sand damage and requires a staff of knowledgeable employees, Eller explained.

Decision Is Right

By OSWALD JACOBY
Newspaper Enterprise Assn.

North's two heart response was a Jacoby Transfer Bid (JTB). After South responded by bidding two spades as requested, North jumped to three no-trump.

In the JTB system this bid shows just about the actual North hand. (Five spades, 10 to 14 high card points and a no-trump distribution.) It gives South a choice between playing three no-trump or four spades.

South's first thought was to pass three no-trump. His own distribution was 4-3-3-3 and he had stoppers in every suit. Fortunately he noted that he only had one heart stopper and his partner might be weak there also. South also saw that he was going to play the hand anyway and all in all that four spades should be the safer spot.

It was a pretty good decision. Playing at four spades he lost one heart, one spade and one club. Had he had passed three no-trump the heart lead would have set up four heart tricks before South could knock out the ace of spades and South would have gone down.

Of course, JTB has no monopoly on successful bidding. North would have made four spades just as easily as South and lots of pairs would have arrived at four spades with North as declarer by using almost any system of responses to the opening no-trump.

CARD SENSE

Q—The bidding has been:
North East South West
1.N.T. Pass 3♥ Pass
2♠ Pass ?

You, South, hold:
♠ A Q 7 5 4 ♥ 7 2 ♦ K J 10 8 3

What do you do?

A—Bid three clubs. This is a ruff force and announces that you have clubs as well as the spades already shown by your transfer bid.

TODAY'S QUESTION
Your partner bids three no-trump over your three-club bid. What do you do now?

SUCCESSFUL CAMPAIGN — Mr. and Mrs. Ed Isensee (shown here), owners of the Cascade Laundry and Dry Cleaners, reported to United Fund officials that they have completed the drive in their firm — the first firm to finish in the pilot division. The employees raised 125 per cent of their goal and the firm contributed 100 per cent of its goal.

C. Davidson Laundry Becomes First To Complete UF Drive

PORTLAND (UPI) — Oregon Democratic National Committee member C. Girard Davidson has submitted his resignation to Democratic National Chairman John Bailey, it was announced today.

Davidson, who has extensive lumber interests in Alaska, has been commuting between his Portland law office and his Alaska headquarters at Wrangell for the past several months.

In his letter to Bailey, Davidson said his Alaska interests "will continue to receive most of my time as well as require extended absences from Oregon."

Davidson has been a national committeeman from Oregon since 1956. He said he planned to attend the Western States Democratic Conference in Salt Lake City Sept. 19-21. He represents the 13 Western states on the national committee's executive committee.

Davidson's successor as committeeman from Oregon will be picked by the Democratic State Central Committee and will serve through the 1964 national convention. The committee has not yet set a date to act.

Chiloquin Chamber Fills Board Spot

CHILOQUIN — The Chiloquin Chamber of Commerce met at the Masonic Hall on Monday evening, Aug. 26, with approximately 35 members and guests present. Dinner was served before the meeting by members of the Cascade Crest Chapter, No. 159, O.E.S.

During the business session conducted by the president, Frank Ohlund, it was announced that repair of the west approach to the Williamson River is in progress and that plans for Pine Ridge Bridge by the county engineer have been projected for construction by Nov. 1.

The vacancy created by the resignation of Al Samples on the chamber of commerce board of directors was filled by the election of Harold Sensenback. He will serve pro tem until the Jan. 31, 1963, term expires.

Decals depicting the chamber theme have arrived and are being sold to interested members at 10 cents each. These may be placed on cars, displayed by businesses, or sold to tourists to promote Chiloquin's industrial and recreational development. Gleta Wampler, chairman of the advertising and promotion committee, is in charge of the decal sale.

In other business, it was reported that the Chiloquin Auditorium, the old Chiloquin High School building, became available for public meetings and other community affairs on Sept. 1. The membership report indicated a total of 71 paid-up members for 1963 as compared with 41 for 1962.

Fremont Forest Report Notes Good Fishing

LAKEVIEW — The weekly Fremont National Forest report states that roads to campgrounds on the Drews Valley district are open to slow travel at this time because of the dusty condition. Fishing is good at Cottonwood Meadow Lake with limits of fish up to 18 inches being caught. Fish are good eating with no algae taste in the past few weeks.

Fire danger is extreme with grass along roads very dry. Extra precaution should be taken with cigarettes, matches, and camp fires. There are a few wild plums on the district which are ripening. Best areas are along lower Cottonwood Lake and along the edge of the valley on the west side of Goose Lake.

On the Bly district, the fishing is reported poor in the south fork of Sprague River. Fire danger is extreme. Logging trucks will be using the Fishhole road. Spring water at the upper end of Lofton Reservoir should be boiled before using.

Fishing is only fair at Campbell and Deadhorse lakes on the Paisley district. Syean and Sprague rivers are also only fair and the Chewaucan River has poor fishing. Fire danger is still high and care should be taken in cheat grass and blowdown areas. Shovel, buckets, and axes are required.

On the Silver Lake district, people using the Benny Creek or the Forest Trunk roads are cautioned to watch for logging traffic. It is recommended that campers bring their own drinking water if camping at Silver Creek Marsh or East Bay campground. Fishing is poor on streams and reservoirs. The fish are biting flies at Lofton Reservoir, but not striking hard enough to land them. Fire danger is moderate to high.

Following the recent thunder storm, the roads on the Warner district may be slick. Wild plums in the district are beginning to ripen; bird hunting is fair. Fire danger still remains high. Several thunder storms recently started two fires.

hot issue!

oil heat vs. gas vs. electricity

a summer decision

Why get all fired up? Oil, gas or electricity are all "warm, comfortable, clean, efficient and modern" methods of heating. It says so in their ads. The burning difference is that Oil Heat costs less than gas or electricity. So, if you want all the comforts of home when it's cold—and still want to save money—there's only one thing to do. Insist on Oil Heat when you buy or build—or when you convert or modernize your furnace. Simple, isn't it? GET THE FACTS FOR THIS AREA... WRITE FOR HEATING ENGINEER STUDY and prove to yourself the Fact is Oil Heat costs less.
