Cutbacks Spoil Retirement

SALEM (UPI) — Tillie Albers was forced to retire two months before her goal of completing 32 years with the State Tax Commission — a victim of the state's austerity program.

She joined the commission in January, 1932—and wanted to retire on her 32nd anniversary date.

But cutbacks resulting from the Oct. 15 tax referendum crushed this dream. As a result of cutbacks ordered by the department, all employees over 65 were forced to immediate retirement.

Japan's Transportation System Lags Behind Times

By PHIL NEWSOM

 Notes from the foreign news cables:

Disaster:
 The sort of disaster that killed 161 persons in a railway collision between Tokyo and Yokohama could happen again at any time. There is no way to prevent it, short of bringing the Japanese economy to a halt. The Japanese National Railway Corporation runs more than 200 trains on a single track each day. About 2,400 trains arrive and depart from Tokyo Station daily. Even a slight error can cause disaster.

Japan Times editor Kazushige Hirasawa capsuled reaction with the comment: "The situation stems from the fact that Japan's transportation capacity is lagging behind the expansion of her economy and the concentration of population in big cities." It's the same story with highways, bridges, harbors, sewage, water supply. Until these catch up, Japan is going to get right on having spectacular and tragic accidents.

Trial Set In Spring

RIVERHEAD, N.Y. (UPI) — The trial of 14 socially prominent youths accused in the house-wrecking aftermath of a debutante's ball probably will be held next spring, authorities said Friday.

They were indicted Nov. 1 on charges of breaking windows and furniture and wrecking the interior of a Southampton, N.Y., mansion rented to house overnight guests at the coming-out party of Miss Fernanda Wanamaker Wetherill of Philadelphia.

The house, located near the home where the party was given, was rented from Robert M. Harriss by Miss Wetherill's stepfather, David S. Leas Jr. Police said about 125 of the youths left the party early in the morning of Sept. 1 and trooped over to the guest house.

The United States is handing out some tough talk to its Western Allies about trade with Russia and her satellites. There will be more of it this week when U.S. Undersecretary of State George W. Ball talks to the NATO Permanent Council and to the Organization for Economic Cooperation and Development (OECD) in Paris. The United States feels the Europeans are granting too easy credit terms to Communist bloc nations and in effect underwriting their economies in a rush for orders. Among those opposing the U.S. position is Britain, backed by several of the smaller NATO members, holds there is no reason for further limitations of trading with the Communists.

The Wheat Deal:
 The U.S.-Soviet wheat deal is expected to have repercussions in Japan. One analysis predicts it will set off a rise in shipping rates and commodity prices, meaning the Japanese will have to pay more for the food they eat and the raw materials they process. Japan's balance of payments will suffer. On the other hand, under-developed countries making more money on their raw materials will be able to buy more manufactured

products from developed countries such as Japan. Some of the pain resulting from U.S. "Buy American" measures will be eased. The Japanese also believe that East-West trade will be stimulated and that in the end Japan may benefit.

NATO Successor:
 NATO Secretary General Dirk U. Stikker is expected to quit in the spring and speculation already is rife over his successor. Names most frequently mentioned include Italian Ambassador to Paris Manlio Brosio, who also is a former ambassador to Washington, Norwegian Foreign Minister Hal-

vard Lange and NATO's Deputy Secretary General Prince Guido Colonna, also of Italy.
