Underbid To Slam
By OSWALD JACOBY
Newspaper Enterprise Assn.
One of the paradoxes of contract bidding is that a pair is likely to reach a higher contract by starting with an underbid instead of an overbid.
Thus in the Onard, Calif., sectional late in October most pairs arrived only at six spades. North would start with a forcing two club or two spade bid and then would move slowly, fearing that his partner would be bidding on high cards in the red suits. Of course, some play was reached seven spades after an opening two bid, but the bidding sequence that had least trouble getting there started with a one club opening by North.
South had a natural spade response and now North was in trouble, but pleasant trouble. How was he going to show his full strength?
He finally decided that the only way would be through a Blackwood four notrump. I don't know exactly what he planned to do if South's response showed no aces, but when South showed one a ace, North continued with five notrump.
I think that North would have gambled out the grand slam if South had shown his one king, but South never gave North a chance.
North and South were playing that a Blackwood five notrump as a follow-up to four notrump guaranteed all four aces.
So South knew about all the aces. He also was pretty sure that North had at least four spades in the ace-king. How else could North have done all that bidding after merely opening one club?
In that case, South's king of clubs and queen of spades had to be all that was needed for a grand slam in spades so South bid it.
