

Christmas Seal Revenue Totals \$4,429

Christmas seal sales in Klamath County have returned \$4,429 to the county Tuberculosis and Health Association as of Tuesday, Dec. 31, Mrs. George Meade, executive secretary of the association, has disclosed. The total revenue is \$20 more than the amount collected during

the same period for 1962. 73 per cent of each dollar is retained in Klamath County while the remaining amount goes to the national headquarters, Mrs. Meade said.

Despite improved methods of treatment, including new medicines and antibiotics, much remains to be done in the battle against tuberculosis, she pointed out.

The disease causes more deaths than all other infectious diseases combined. One-third of the American people are infected with TB germs, many of whom break down and become some of the 85,000 active cases which develop each year.

Mrs. Meade estimated that 250,000 people throughout the nation are estimated to have tuberculosis. Medications help to bring the germs under control, but this is only part of the job. "Long and careful treatment is necessary to enable the body to heal."

Theta Rho Set Public Program

MERRILL—The Merrill Theta Rho Girls will install officers Friday, Jan. 3, at 7:30 p.m. in the Merrill IOOF Hall. The public is invited to witness the ceremony.

Janny Hodges will be the new president; Audrene Cunningham, vice president; Nancy Kandra, recording secretary; Karen Chapman, financial secretary, and Jean Lyman, treasurer.

"Tuberculin tests and chest X-rays are necessary to find TB early, when it can be cured most quickly and easily," she explained.

Those in need of information about the disease are urged to call at the Tuberculosis Association headquarters, 1949 Main Street.

Program Revamped

(Continued From Page 3-A)

The student will learn the principles of expression, study the work of other writers, and finally, practice diligently the art of writing itself. In this manner, he will learn to express ideas clearly, correctly and logically," the department reports.

Writing assignments include comparisons, analyses, critiques and essays.

Despite its completeness, the new English program is not designed to be static, as "deadly repetition" is to be avoided. The course will be modified and adapted to fit each teacher's needs and techniques and to conform with the changing events and patterns of each year.

"Finally," the department says, "it is anticipated that through its use, learning our language will become a stimulating, meaningful, progressive experience for every student who applies himself."
