

# Hoyt Pleads with Those Who Would Wear Stays

By HEDDA HOYT  
(Fashion Editor, United Press)

Slender waists are in they say bring on reducers and the corset stay!

Now is the time for all good women to come to the aid of the low waistline! For high waists are slowly but surely creeping back into style again. And that means corsets! And discomfort! And eventually perhaps the hideous hour-glass figure.

Waistlines seem to be following the "high water" vogue set by hems, bobs, sleeves and what not, but rather endure the high cost of living, my dears, than a high waistline. Should the normal waistline actually return there will be weeping and wailing and rolling on floors for most of us will find that we have curves that we never suspected when we tie a string belt about our no-longer wasplike equators. We will appear as matronly as our mothers. We will have to shorten our paces when dancing with the young shiks of our own age ere we disclose to onlookers too clumsy hips.

We will face a winter of starvation with flapper figures as our goal. And even the flapper will turn away the dish of marshmallow ice cream as they begin to add up their calories. Maiden ladies with clothes-pin figures will look like 1924 belles compared to many of us "under-twenties" who have been breath-

ing deeply through uncorseted diaphragms these last few years.

**Collapsible "Fronts"**  
Even now we find the "collapsible" figure making its appearance the figures with the straight "back" line and the collapsible "front" effect.

Those who can manage the collapsible front are in luck as many of us lack the powers of the contortionist. However, we see among the recent sponsors of the high-waist line, girls, who manage to flatten out the cupid-like abdomen at a moment's notice. Of course, one can flatten the front figure somewhat by standing up straightly with shoulders erect but that is bound to add "chest" to one's figure—a disastrous effect in these days of prominent shoulder blades and flat chests.

**Watch the Mirrors**  
Let your mirrors be your guides, my sisters! If you wish to remain uncorseted stick to the low waistline or the beltless frock. For if we begin to develop waistlines again, we will surely return to the long-boned corset which restricts our freedom while restricting our surplus avoirdupois. Why go back to the days when we tied our corset strings to the doorknob as we pulled like dray horses in the opposite direction.

None but the brave deserve the high waistline. And certainly none but the very slender will attempt to elevate the waist which now occurs any place be-

tween the knees and the hips. Women have not dressed so sensibly in years as they do now, with the entire weight of frocks falling from the shoulders and with no confinement about the body which restricts its natural freedom. Also, women have never appeared so youthful in figure. Even very stout persons have achieved a straightline effect in the modern silhouette where formerly, in years past, they bulged out like potatoes from the great northwest. It has been said by designers who are urging resumption of the high waistline that tube-shaped frocks make all women look exactly alike. This may be true but if we return to pinched-in waistlines every girl will look like her own mother, in figure, at least.

## WORLD FLIERS FINISH FLIGHT AROUND GLOBE

(Continued from Page One)

were two hours ahead of their schedule. Half an hour earlier an escort of 16 planes sailed east to meet the fliers. The planes, with world fliers in the lead, flew in perfect columns of three.

While "crossing the trail" will not be official until the fliers reach Santa Monica where the flight northward started the planes were given initial tryouts here and were flown from here to Santa Monica. The parents of Lieut. Smith and the mother of Lieut. Harding greeted the fliers here.
