The Good Old Days

Most of us can remember when a man's right
hand was his grain drill. With a sack of seed hung
on a shoulder, we trudged wearily across the
field, dipping rhythmically into the sack and fling-
ing the seed broadcast. We thought we were doing
a good job, too! But we've learned a lot since "the
good old days." And we are still learning. We
now know that there can be just as much difference
in the kind of sowing done by grain drills as there
is in the sowing of different men.

KENTUCKY GRAIN DRILLS

When you drive into your fields with one of
these grain drills, you can rest assured your grain
will go into the ground right. None of it will be
wasted, nor will there be any spots skipped, or seed
matted. The seed will be evenly distributed, de-
livered to the exact depth you choose, and properly
covered. Every seed and every acre will get a square
deal.

Get one of these splendid drills. It insures the
best yield it is possible for your seed, soil and
weather to produce.

For 100 per cent satisfaction, you can bank on
the McCormick-Deering line, which includes Ken-
ucky Grain Drills.
