Only Two and Half Weeks Are Left in The News Contest

Two and a half weeks more and this interesting campaign will come to a close and the most stupendous list of prizes ever conceived by a newspaper in this part of the country will be distributed.

The "first period" of the contest comes to a close next Monday night at 9 o'clock. The present vote scale of 200,000 extra votes on every \$30 in subscription collections will be in effect until that time—then the schedule is very sharply reduced.

A few of our old subscribers are behind in their subscriptions and one of the objects in staging this contest was to bring such accounts up in advance or at least to date. For this reason, collections secured from old subscribers to apply on their back account earn the same votes in proportion to the amount paid as advance payments.

If each contestant will take the time to explain this to the subscriber, that old accounts must be given attention, you will be surprised at the amount of money that you can bring in. Build with STONE-TILE

Stucco That Stays

In the design of modern buildings stucco exteriors are rapidly increasing in favor and Stone-Tile walls make the best possible base for this style of finish. Note the distinctive pitted texture of Stone-Tile units, and the close spacing of joints in the wall, assuring an unbreakable bond with plaster of any sort. The low absorption of Stone-Tile also promotes a thorough "set" in the finish material. Build permanence and lasting beauty into your home or business building by using Stone-Tile walls as the base for stucco. The first cost is often no greater than frame and the last cost is always less.

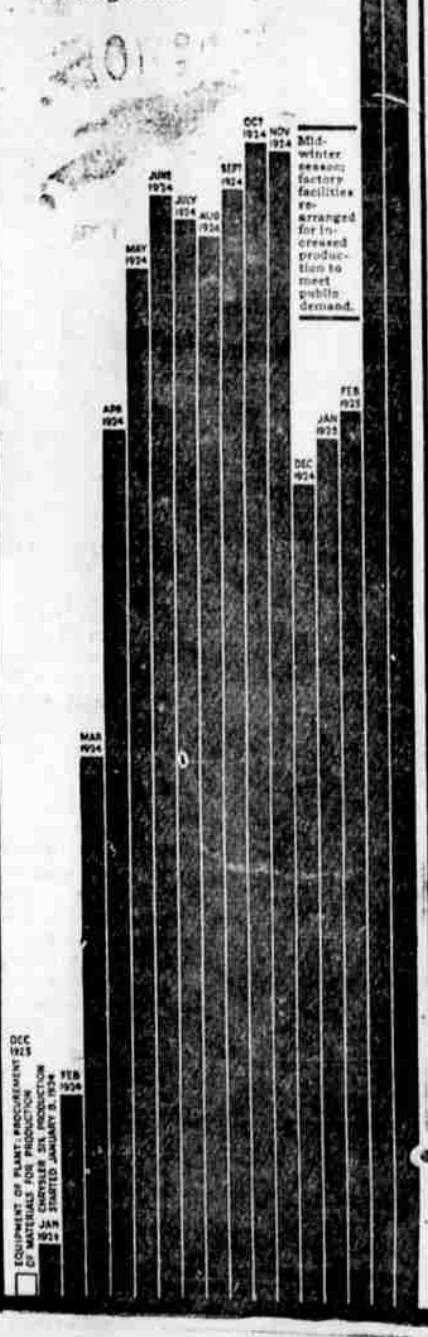

See Stone-Tile before you build.
