June, and the Telephone

ROMANTIC June, with its weddings and graduations, brings many urgings to the American heart to be off to some distant place.

Why not go, when the campus calls to the colors, when sons and daughters want your presence at commencements, when you feel the stir to be somewhere else, as audience or actor?

With long distance to serve, you can be wherever you want to be. There are 16,000,000 telephones in the nation-wide communications service built for your use. One of them is always near to send back decisions and desires to home office, or carry words of love or greeting to places that call your thoughts.

The romance of life is in the air, and the great romance of modern days—universal telephone service—is yours to further it.
