Be sure of your furnace!

Your comfort—even your health—depends on the kind of heat you obtain from your furnace. That kind of heat depends on the construction of your furnace and the skill with which it is installed in your home. Health requires an abundant circulation of warm moist heat! Not just heated air. Comfort requires adequate heat at minimum expense and effort.

AVOID GETTING "TIRED OU...
SCIENTISTS SAY TIRED-OUT PEOPLE ARE UNATTR...

Recent investigations regarding human endurance brought out the following three facts:

1. When a person is tired, perception is dulled, and one cannot give close attention to work.

2. Through fatigue an undue strain is placed on nerves and muscles, and they are kept keyed up to the greatest possible tension.

3. Fatigue is a severe tax on your nervous system that detracts in every way from your charm.

Thus to be attractive you must avoid becoming tired out; you must save your energy.

As you think over your list of friends, you will acknowledge that those you like best are the ones who are full of life and "pep."

There is always a demand on a person's strength, whether it be from household cares, or from business affairs; and our protec... tion against wearing ... care of our health.
