## Is a Lion afraid of a cock?

Medieval wisecracs used to wag their heads and tell tales like this in the village marketplace.

An amusing superstition, of course, but is it any more absurd than the belief that there is something mysteriously "better" about eastern motor oils just because they cost more and come from eastern crudes? Professional drivers and economy-run experts out after records don't share this superstition—why should you pay tribute?

**Zerolene—the choice of Western Motorists**  
Zerolene lubricates more cars in the Pacific Coast states than any other oil made—a better oil if it does cost less. Zerolene increases the gasoline mileage, reduces the carbon removal and maintenance costs and lengthens the life of any car in which it is used.

**Zerolene checked fifteen times for quality**  
As a matter of fact the best crude so far discovered for the manufacture of motor lubricants is obtained on the Pacific Coast. And the most highly developed refining process is the high-vacuum process, the patents on which are held by this Company. And 15 positive checks on Zerolene at the refinery make quality control absolute.

Why pay tribute to superstition when you want the best oil you can get? Insist on Zerolene—ask for it by name.

### Get the Facts!

A series of independent and impartial reports showing the experience of large users with Zerolene has been collected in our booklet, "Why Pay Tribute to a Superstition?" Ask any Standard Oil Company representative or Zerolene dealer for a copy.

Insist on ZEROLENE even if it does COST LESS
