"My ELECTRIC RANGE"

ECONOMY isn't the *only* reason why housewives take such a natural pride in their electric ranges. It's one of the practical reasons, of course—like the quick, clean, electrical heat, the freedom from fuel and ashes, the better roasts and baking. But after all, these might be a man's reasons for equipping his home with an electric range. Woman's reasons go deeper. If you wish to see what every woman thinks of clean, convenient, efficient electrical appliances throughout the home, notice the pride with which she says, "MY electric range."

There is now an electric range in one out of every seven houses on the COPCO system.

Select one for your home from the models on display at your nearest dealer's. Convenient payments may be easily arranged.
