W. Holt in police court yesterday. M. McCornick, charged with driving with insufficient lights, was fined \$5 by Police Judge Gaghagen yesterday.

Be sure of your furnace!

Your comfort—even your health—depends on the kind of heat you obtain from your furnace. That kind of heat depends on the construction of your furnace and the skill with which it is installed in your home. Health requires an abundant circulation of warm moist heat! Not just heated air. Comfort requires adequate heat at minimum expense and effort.

Federation

"TO form a more perfect union" was the animating thought of the statesmen who met to draft America's constitution. Their problem was to weld the sections they represented into a political entity that would function most efficiently and enduringly in the service of the people.

A similar problem was presented nearly a century later to the organizers of America's telephone service. Licenses under the first patents were being granted to isolated companies that were

forming to introduce local service. "A more perfect union" of these companies seemed, from the beginning of the telephone's adoption by the people, to be essential, and so the structure of the Bell System was planned.

This organization exists today substantially as it was then conceived—a group of companies each preserving its individuality and applying local knowledge to local needs, but all federated into a single cohesive union in order that nation-wide, universal service may be provided.
