

BUDD SAYS K. F. SUPPORT NEEDED

(Continued From Page One)

been estimated that the coming of the two mill concerns and the northern lines would treble the present population of the city.)

37,000 Miles Linked

Mr. Budd pointed out that when, and if Klamath Falls is linked with the northern lines, 37,000 miles of railroads will be connected up with the Klamath country. A large percentage of the territories covered by this 37,000 miles are great consumers of pine timber, of which there is a super-abundance here.

In the party with Great Northern executives were Robert Budd, a son of the rail president; A. J. Witchoff, chief engineer of the Oregon Trunk, and C. E. Lintner, Oregon Trunk engineer.

Man Accused of Attacking Pard Gives Self Up

"I've got nothing to run away from. Here I am."

It was C. C. Caid talking to Klamath county officers yesterday afternoon. Caid, accused of attacking Harry Munson, an employe of the Forest Lumber company, walked into the sheriff's office and gave himself up.

Officers gave Caid the benefit of the doubt. They expressed the belief that he is "on the square."

Caid will be arraigned in justice court next Thursday. The nature of his plea was not indicated.

Caid is charged with assault with a dangerous weapon on Munson. It was alleged that he struck down Munson following an argument.

Details regarding the altercation have not been made public. Following the fight, it was said, both men were discharged.

Officials at the Klamath Valley hospital last night said that Munson "is getting along very well." They insisted that there is no cause to worry over his condition.

Caid originally was believed to have left for Grants Pass.

His automobile was accepted as bond by officers last evening. The alleged attack occurred Tuesday.

158,000 Miners Walk Out At Midnight Mon.

PHILADELPHIA, Aug. 29.—(United Press)—The impending anthracite coal strike began to make itself felt tonight throughout the districts where 158,000 men will cease work Monday at midnight.

Already some of the workers, notably in the Pottsville district, had removed their tools from the pits and gone to their homes until the strike shall have ended.

For the moment, John L. Lewis, president of the United Mine Workers and director of the strike, became the general in charge of the economic destinies of a vast army of men, affecting thousands of families.

All Metal "Foolproof" Plane Found for Air Lines

Army and navy aero experts are praising the "Yorktown," all-metal airplane of a new type developed by Count Igor Sikorsky, Russian exile. It is believed "foolproof," because it is constructed so that the pilot cannot do "stunts," and if it gets out of order, can only glide. The type has been adopted for use on the proposed Boston-Havana, Boston-St. Paul air lines. The plane is shown at Boston.
