**Planted for Keeps**

These fine heavy-bearing trees were planted in 1897, every tree being set in a hole blasted with

**DYNAMITE**  
(A Pacific Northwest Product)

The results are not only indicated by the thrifty appearance of the trees themselves but are shown every year by their heavy yield of fruit.

Tree planting with dynamite is successful because it—  
thoroughly loosens and shatters the sub-soil  
makes root penetration easy  
puts great stores of plant food in easy reach  
destroys fungus and nematode  
causes early maturity  
cuts down tree losses

and pays a heavy return on the investment through increased yields. Ask our dealer for Du Pont Dynamite.

Write for "Development of Logged-off Lands," which has complete details on tree planting and other farm work that can be done profitably with Du Pont Explosives.
