

"Let us have faith that right makes might, and in that faith let us to the end dare to do our duty as we understand it."—Abraham Lincoln.

Get a Broader Viewpoint

There Are Others In The Field

Because our country is so large, we are often inclined to narrow our views regarding its various activities to the more immediate sections in which we live. Californians may think their state is a leader in road work, New Yorkers that they have the only modern buildings, and Florida that it has the principal recreation resorts.

To show the narrowness of such views, consider the road question alone. The southern states, which have been generally advertised as having bad roads, are rapidly forging to the front in the construction of new paved motor roads. Reports from the highway departments of 16 southern states show that under their direction, a total of \$170,000,000 is available for new roads this year.

Including the construction work under way by counties and townships, the sums being spent in the south this year for road improvements will aggregate approximately \$400,000,000. In the new construction, the asphaltic types of pavement predominate and their mileage this year will outstrip any year heretofore, on account of their practicability for all types of hard-surfacing.

As it is with roads, so it is with other lines of activity. The whole country is growing. We should all know more about its resources and realize that its development is not confined to any one favored section.

Perpetuate the Forests

Pacific States Are Realizing The Necessity

Pacific states are working out a plan by which each acre of forest will begin growing a new crop as soon as the present crop of standing timber has been removed.

Only by new plantings and protecting natural growth of young trees until maturity, can the lumber industry be perpetuated and remain a permanent source of prosperity.

Unless this is done and a new crop of trees is raised to replace logged-off areas, the lumber industry will gradually become extinct.

A. W. Cooper, manager of the Western Pine Manufacturers' association, shows that nearly half of the labor, business for farmers, merchants, banks, other industries and traffic for railroads and shipping depends upon the lumber industry.

He says the best home market for farm products will be gone and the mountains eroded by rain and snow if reforestation of the denuded regions is not provided.

Unfair to the Women

But The Situation Is Fast Improving

Within a decade, electric stoves, washing machines, ironing machines, water heaters, mixing devices, refrigerators and similar power appliances will be as much a part of a house as the modern bathroom, is the prediction of Earle E. Whitehorse, editor of Electrical World.

"While the modern office is filled with labor-saving devices, only 18 per cent of the homes are thus provided. The women are required to do the same kind of drudgery their grandmothers did, all because the home is away behind the times."

Lax Discipline Caused Escape

Voters Will Fix Responsibility

The coroner's jury at Salem decided that the recent escape of convicts from the state penitentiary and the attending tragedy, were due to lax discipline, but no responsibility for the absence of discipline was fixed by name. Not necessary. The voters will fix the responsibility. The coroner's jury was reluctant to declare the whole truth.

The Lusitania claims commission has decided that Alfred G. Vanderbilt, owning a hundred million dollars, was "worth" nothing in himself because he had no active business interests, and no member of his family could show a direct financial loss as a result of his death. Elbert Hubbard, the writer, was valued at \$59,500; but he was so near the end of a productive life that his valuation is low compared to his earnings.

Safety First—"Stop, Look and Listen"

The Best of Advice

By CLARK KINNAIRD

Seven Wise Words

A western man, passing on, wills \$700,000 and seven wise words to his son.

The words may happen to be as valuable as the money. They are: "No Man Was Ever Wise by Chance."

The western man may not have known it, but Seneca the Roman preached the same idea in exactly the same words about the time Christ was being tempted by the devil for forty days (as set forth in the gospel according to Luke).

Where a mind is not growing CONSTANTLY, there is no wisdom—for wisdom comes in no other way. What process is more wonderful than this?

In one of the strangest chapters of his "Psychology" Spencer makes an effort to show the necessary order in which the development of conceptions in the human race occurs.

No ABSTRACT development can be attained, he says, until the outward experiences have reached a degree of definiteness and coherence.

Thus we cannot expect wisdom of suckling babes, or even of the majority of men, because their outward experiences have not reached this state of definiteness and coherence.

What is the hardest task in the world? Emerson asked the question, then answered it: to THINK.

Yet the cruelest minds are scrawled over with thoughts, vaguely factual.

And the key to every man is his thought. This is a platitude, but none the less true.

Men walk as the prophecies of the next age. Once Emerson wrote:

"In the thought of tomorrow there is a power to upheave all thy creed, all the creeds, all the literatures of the nations, and marshal thee to a heaven which no epic dream has as yet depicted."

The violent exercise most hurtful in hot weather is done with a knife and fork.—Rochester Times-Union.

Dinner Stories

The fresh young traveling salesman put on his most seductive smile as the pretty waitress glided up to his table in the hotel dining-room to get his order, and remarked:

"Nice day," little one? "Yes, it is," she smiled. "And so was yesterday, and my name is Ella, and I know I'm a pretty girl and have lovely blue eyes and I've been here quite a while and I like the place and don't think I'm too nice a girl to be working here. My wages are satisfactory and I don't think there's a show or dance in town tonight, and if there was I wouldn't go with you. I'm from the country and I'm a respectable girl, and my brother is the cook in this hotel, and he was a college football player and weighs 300 pounds. Last week he pretty nearly ruined a \$25-a-week traveling man who tried to make a date with me. Now, what'll you have—roast beef, roast pork, Irish stew, hamburger or fried liver?"

Heart & Home Problems

By Mrs. Elizabeth Thompson

Married, But Has Eyes for All Women

Here is a letter I'd like some of the men readers of this column to comment on:

Dear Mrs. Thompson: Do you believe a married man, who claims to love his wife and baby, who provides to the best of his ability and saves every cent he can, should walk down the street and "neck," I call it, at every woman and girl who is half good looking? He humiliates me on every occasion by staring at and turning around to look at every painted doll who passes. Is this merely because he is interested, curious, or what? If he was unfaithful wouldn't he be careful to hide it from me? We have many quarrels over this. Now we are both young and he is a very good looking man. No shiek, though. I have always been considered good looking, never wanted for a good time or attention. I know he is jealous of me. I never do nothing to cause jealousy in him. I never look at other men, although I am aware of their glances. I have to trust my husband. His position demands that he dress well and much of it is after supper. Evenings. Then why should he try to make me suspicious of him? I hate to think he is out with some flapper.

This habit is one nearly all men have in common. There are but few men who do not take a second look at a pretty woman. In your company, however, your husband might be less thoughtless and ungentlemanly in this respect, since he knows that the habit annoys you. But he may do it deliberately to annoy you, "just for fun."

I do not think it is an indication he is unfaithful to you. Do not quarrel with him about it, but ask him to be more considerate when he is out with you.

Vain Sorrow
Dear Mrs. Thompson: I am considered one of the best looking girls in town. I went with a boy once. He went with other girls. I love this boy, but he does not return the affection. He has never asked me for a date, except only

Very often the corners of the edges of small carpets and ragged. Usually she cut off. This will be all right while, but soon they will be the same condition, i.e., cutting, take some strips (wide) of the adhesive paper is used in making dress forms and paste along the thus holding the edges up.

By ARTHUR WYNNE,
Originator of the Modern Cross-Word Puzzle.

Here is the second half of the "Squaring the Circle" step-word puzzle, the first half of which was presented for your solution yesterday. Did you succeed in solving the first half? Check your answers with the solution given below. To my regret, the puzzle takes us from METTLE to CIRCLE, completing the evolution SQUARE to CIRCLE in 35 steps. The definitions given below serve as guides in enabling you to find the correct word to do each step.

DEFINITIONS:
19—To mark with spots
20—A vessel for liquids
21—Engagement
