**"She's better than she used to be"**  
—starts easier, climbs hills better and gives less trouble all around. And I believe the answer is this new Zerolene "F" for Fords I've been using. It costs less than the oil I'd been using, but it actually seems to lubricate better.  
Zerolene "F" for Fords gets to all the parts requiring lubrication—especially the wrist-pin bearings and upper half of the cylinder walls.  
Zerolene "F" for Fords is made by the Standard Oil Company's patented vacuum process. It deposits a minimum of carbon, and because it lubricates better it enables the engine to develop a noticeable increase of power over and above what Ford owners have been accustomed to expect.  
A Ford is an A-1 transportation investment. Protect your investment by proper lubrication.
