

RADIO DEVELOPS YOUNG INVENTORS

NEW YORK, March 26.—(United News)—A nation of inventors and engineers composed of the younger generation of radio and electrical students and technically educated by radio itself is foreseen by E. F. W. Alexanderson, one of America's leading radio engineers.

"Radio will be the school of training which will educate the engineers, inventors and scientists thousands, not by the thousands but by the millions," Alexanderson told the annual meeting of the Institute of Radio Engineers recently. "If you will let loose your imagination what may you not expect from generations so trained?"

"The future great discoveries regarding the nature of matter, energy and the universe will be made by those who, as boys, have been playing with electrons and probing the lengths and depths of space by radio waves."

Alexanderson pointed out that, due to the popularity of radio, "almost every high school boy had some intimate knowledge of a complicated art, which, not long ago, could be grasped only by a few."

Technical training and opportunities for scientific study and discovery had been very limited in the past, he pointed out.

"The forces of nature will in the future be harnessed on a scale not yet imagined in the form of electricity made into an indispensable servant in every village and farm, but the engineers who invent, plan and operate this new development will all be trained in the school of radio. They will all speak the same technical language and their imagination will follow out the thoughts which were started in their early training."

Williams Court Martial April 6th

WASHINGTON, March 27.—(United News)—The court martial of Colonel Alexander S. Williams on charges of intoxication brought by Brigadier General Smedley Butler has been set for April 6 by Secretary of Navy Wilbur.

The trial will take place at San Diego, where the incident which led to the charges occurred.

Williams was alleged to have been intoxicated during a party he gave in honor of Butler who succeeded him as head of the San Diego marine corps post.

Rear Admiral Thomas Washington, commander of the 12th division at San Francisco, has been named president of the military court.

Other members of the court are Brigadier General Ben H. Fuller, U. S. M. C., Captain Joel R. Prindle, U. S. N., Captain John T. Thompkins, U. S. N., Colonel Louis N. Galick, U. S. M. C., Colonel Fred L. Bradman, U. S. M. C., Colonel Jas. Breckenridge, U. S. M. C., and Captain Edward Herne, from the U. S. S. Seattle.

MAKES EASIER STEERING

Steering is made easier—and in many instances safer—by grasping the wheel at the sides near the top. With the hands in this position a quicker, sharper and easier turn can be made in either direction. A full right or left turn can be made with one downward pull on the wheel by the hand on the respective side. For ordinary driving it may be more comfortable to keep the hands on the bottom of the steering wheel rim, but when tackling traffic or a winding road the top of the wheel is best for top-notch driving.

BOSCH RADIO

The Ambotone Reproducer \$27.50

With the Mellowness of Wood

A new tonal quality and a better radio reproduction. The Bosch Ambotone with its wood conoid offers you these most desired features. You have not heard the best in radio reproduction until you have heard the Ambotone. Come in and hear it.

BALDWIN HARDWARE CO. "The Winchester Store."

MANUFACTURE YOUR OWN FEED!

LETZ-DIXIE MIXED MEAL MAKER

Reduces cost of feed 25 to 50% and increases production 15 to 30%

Follow the Letz system of feeding and bring back year-time profits. Amazing results! Nothing else like it! Produces more milk, beef and pork at half the cost! Turn loss to profit! You owe it to yourself to investigate today!

The Letz Dish grinder cuts, recuts, mixes and grinds cornstalks, straw, hay, stems and vines with the grains into a bulky, tasty, balanced ration that produces surprising results.

No brain racking study required. Just plain common sense, immediately applied, will put your cattle on an entirely new and highly profitable feeding basis.

Come to our store and get the Letz pamphlet, "A Lesson On Four Stomachs." It exposes valuable facts about cud-chewing animals.

COMMON OWNER MISTAKE

There should be a slightly greater clearance between the stem of an exhaust valve and its push rod than between the corresponding parts of an intake valve. Most car owners make the mistake of making all the clearances equal, whereas the exhaust valves should be allowed more room for expansion, as they always operate at a higher temperature.

COAST OVER THE CREST

When out to save gas most drivers coast down hills, risking excessive coasting speed and relying too much upon their brakes, whereas gas could be saved without risk by coasting over the crest of each hill. Usually a car has more momentum at the top of a hill than it needs, which results in excessive use of the brakes before it reaches the bottom again. By disengaging the clutch when it becomes evident that the car has sufficient momentum to carry it over the top, it is possible to coast about 100 feet at the crest of every hill.

Picture Your Own Home IN BUENA VISTA

Addition

Klamath Falls Preferred Residence District

Home owning is easy. The first step in acquiring a home is to buy a piece of ground. Furthermore buy that piece of ground where there is an assurance of increase in real, social and home values. To that end we suggest Buena Vista addition, with its natural lay for home beautifying.

The increase in the value of a home is not so much in the real value on the market, regardless of the desirability by some other person or family, but in the value it creates for your own family in development of character, independence and social respect—true values to all.
