

AIR LEADER'S FATE UNKNOWN

Armored Cars and Planes Comb Desert for the Missing Flyers

CAIRO, April 15. — (United News)—In the midst of desert sandstorms, braving murderous African tribesmen, searchers in armored cars and airplanes are renewing attempts to find Captain Estevez, leader of the Madrid to Manila flight, who was forced to land last Sunday 120 miles east of Amman, ancient Biblical capital of Palestine.

Due to the isolated district in which Estevez and his companion flier were forced to land, the chance of their recovery alive is slight.

The two were on the Bagdad to Cairo hop when forced down. Their plane was found five miles off the usual air route, in a land of little water and of dangerous desert tribes. They carried food for only one day. The small chance that they were picked up by some friendly natives, however, has caused the order that increased efforts be made to find them.

Search Ordered.

Three planes were in the flight group. By agreement Captains Loriga and Gallarza, in two other planes, must press on without their lost leader. They are now at Karachi, India, preparing to fly on to Agra.

British and Spanish government officials have ordered every possible search be made for Estevez. Excited crowds in Madrid are reported to have besieged the war ministry for news of the air man. The British government has ordered the royal air force fliers in Cairo to exert every effort to find him.

Estevez and his companion may wander for days, even weeks in the north African desert country without news of him reaching the outside world. They may be taken up by dangerous Bedouin tribesmen or they may be so fortunate as to fall into the hands of natives who will handle them well.

The abandoned green airplane which led the confident Spanish party on its trail blazing adventure was found Monday. With it was a note from Estevez that he and his companion were attempting to reach Amman on foot. It is the belief of fliers here that the two Spaniards may have wandered for miles in the wrong direction.

Airplanes have been sent out in all directions from Cairo in the last 24 hours. Fear that Bedouins might be encountered caused the use of armored motor cars Thursday. In addition expert trackers were sent out.

Textile Strikers Under Iron Hand

PASSAIC, N. J., April 15.—(United News)—With one county in the textile strike area under virtual martial law and 150 deputies armed with shotguns ready to be sent into another, the situation in Passaic and surrounding towns continued gray Thursday night, despite a day of inactivity on the part of the 16,000 strikers who waited word from pickets in Washington and Trenton.

As police dispersed the group of strikers and their children about the White House and the Trenton picketing failed because of the illness of Governor Moore, authorities appeared for renewed disturbances.

Civilians were hastily sworn in as deputies and while no soldiers were used, the district took on the appearance of an armed camp as police patrolled the streets with guns prominently displayed.

TO DON HIGH HAT
KANSAS CITY MO., April 15.—(United News)—Levi Merrill, 89, who is the "Uncle Ike" depicted in Harold Bell Wright's story, "The Shepherd of the Hills," will leave his duties as postmaster of Notch, Mo., Ozark crossroads, long enough to participate in the christening of a mail plane of the National Air Transport, Inc. "Uncle Ike" has been postmaster at Notch for more than 40 years.

NO WOOL TRADING.
PORTLAND, Ore., April 15.—(United News)—Lack of trading continues to be indicated in the market for wool at Oregon and Washington, as well as Idaho points. Shearing operations are gaining. Buyers are looking over supplies, but are making practically no bids at the moment. Private messages from Boston to local firms indicate a dull trend there.

To read The Klamath News day after day is to keep thoroughly informed on happenings of importance throughout the world as well as in Klamath Falls and vicinity.

POLICE BATTLE FUR STRIKERS

Order Finally Restored in New York Disturbance Affecting 15,000

NEW YORK, April 15.—(United News)—Scores of policemen battled Thursday afternoon with a crowd of 10,000 fur strikers who became frenzied when they could not enter a meeting at Carnegie hall, where the American Federation of Labor officials and other labor leaders were to urge settlement in the nine-week-old fur strike which affects 15,000 workers.

Five thousand men and women had jammed into every available corner of the auditorium and their hisses, jeers and screams at the labor leaders added to the discon-

tent of those who could not gain entrance.

As excited men and women screamed and shouted their denunciations of "scabs, murderers and traitors," ominous rumblings spread through the mob outside. In a few minutes the disturbance began to resemble a riot.

Traffic in the vicinity of the hall was almost completely blocked and policemen seeking to clear a lane were overwhelmed. The first force of reserves were unable to stem the angry tide and more reserves were rushed from other stations. Scores of policemen were soon at the scene and double lines of uniformed men charged the mob. They succeeded in restoring a semblance of order by dividing the protesting thousands.

Here From Merrill—Mrs. George Offield of Merrill was in the city yesterday to visit with her daughter, Miss Vera Offield, and son, Lester Offield.

April 19th Starts Our Special DEMONSTRATION

MONTAG COLONIAL RANGES

The buffet and all the late styles in Montag cast iron and steel ranges will be on display.

The new enamel ranges are here—a tone to suit any kitchen color scheme; white, blue, gray, and "Santone" (the new shade of the year.)

A factory representative will explain the many advantages of these Western made ranges.

The wide and shallow firebox that saves fuel, the French cooking top that economized on heat and cooking utensils. And other superior cooking qualities peculiar to Montag Colonial Ranges.

Just One of Many Styles Now on Display in Our Stove Department

The illustration to the left pictures the Montag Buffet Type, which is just one of the many styles we have to make your selection easy. This range is equipped with the new buffet shelf in place of warming oven.

There are models with roll-top or drop-door warming closets, ranges in all enamel, enamel and nickel trim, enamled cast steel, or all black with nickel trim.

The oven is so designed and placed as to enable large volume of heat to circulate evenly entirely around the oven. This feature accounts for the splendid baking results for which the Montag ranges are well known.

Your Old Range Taken in Exchange.

Or you may exchange your old range as part down payment for a new one. We shall be glad to look over your old stove or range and make you a most favorable proposition.

Note the new French Plate Cooking Top.

All in one piece, excepting for the two lids over the firebox, of highly polished steel, easy to keep clean. Heats rapidly, and retains heat longer than the partitioned top. You can cook hotcakes, broil steaks, fry eggs, etc. right on the stove top as the famous French chefs have always done. It means a great saving of time as well as convenience. The new French cooking plate top is now available on all Montag ranges.

THE WIDE AND SHALLOW FIREBOX Saves Fuel

This special Montag feature allows fire from fuel to spread over more area. It places the heat directly under the stove top, which means more heat from the same amount of fuel, and a quick fire.

Emphasizing our service to you Our ability to select and buy right gives our customers unusual values at unusual prices.

These features of our service give you the opportunity of selecting your new range from one of the foremost range departments of the Northwest.

These Special Features Identify All Genuine MONTAG Ranges

Made by the Montag Stove Works, Portland, who have been making good stoves and ranges for over forty years. They know just what the conditions out here are, and they build ranges to meet them. Montag ranges are built for Western fuels, and are built entirely in the great Montag plant of best available materials, including Armco rust-resisting iron.

Montag Enamelling Has Outstanding Quality

All of Montag enamelling (as well as nickel plating) is done in Montag's own plant under Montag supervision, and with Montag methods. Montag's porcelain enamel is especially noted for its smoothness, high gloss, and richness

of color. Your choice of white, grey, blue, or the new Montag origination—Santone—a harmonious sand color that blends richly with modern kitchen color schemes.
