There's This "Human Side" To Gasoline and Oil—

A very human one, we think—here in the West—to Union Non-detonating Gasoline and Aristo Motor Oil. And we believe that you'll be interested in it

YOU, probably, don't think much about the gasoline and oil you use. You buy a good grade. One makes your motor go. The other lubricates it. You don't check up very accurately on mileage or on costs. You simply get "ten gallons" or "a quart," and off you go. It's rather impersonal.

And yet a gallon of gasoline and a quart of oil are chock-full of personality! There is the personality of those extremely human beings who are intensely interested in making theirs the best, even if it be by but a shade—and there are people like that in oil companies, just as you may be like that in the business you are in.

Speaking for this Company, we can say that we have hundreds of them—all vibrant personalities and all eager to excel. For when they do excel they rise, and are promoted, and their wives, their children and their friends are proud of them.

You know what it means. It isn't extra money in a salary raise or a large income that you enjoy so much. It is the achievement of which the money is the evidence, and you get the "kick" from that.

So it is with "Union Oil" with Union Oil directors and employees.

Union Oil Company of California

They want to make a better gasoline, a better oil, to satisfy a natural desire to work, achieve, surpass, succeed, for it is simply human to do that.

If you could ask any of our chemists, or Union Oil refiners, or research men—the men who handle the processes, or those who check results—about the quality of non-detonating Union Gasoline and non-carbonizing Western ARISTO Motor Oil, their conviction, we believe, would convince you. Their belief would inspire yours. Their enthusiasm makes you enthusiastic.

In them you would find the "personality" in "Union" and "Aristo," for these simple looking liquids are "the children" of these men.

If you could make one trip through a Union Oil refinery and a research plant, which would remind you of a university, you would never again think of non-detonating Union Gasoline and non-carbonizing Western ARISTO Motor Oil as anything else but intensely human things.

And you would be, as we are, so naturally and logically prejudiced in favor of them that you would use them always in your car thereafter.
