TO STOP NAUSEA IN THE MORNING

Or Grogginess in the Stomach At any Time

Try a little diapsin. You may be so sick in the morning that the odor of food adds to your misery. And yet one or two diapsins instantly settle your stomach, the nausea disappears and you actually become hungry. Diapsin is composed of powerful digesters. They work on everything you eat, digesting starchy foods, milk, cream, eggs, meat and also absorb acids and gas. Heartburn, biliousness and dizziness disappear almost instantly. Nausea may come from many causes but diapsin works quickly in any case. Expectant mothers get real benefit from diapsin, not alone in freedom from nausea but more nutrition from better digestion. Get a 60 cent package of Pape's Diapsin at any drug store. You'll never tolerate nausea again.—Adv.

TOOTH SENSE

The most important points for any one to consider when having any kind of dental work done, are:

- 1—Restoration to look as natural as possible. Pleasing to the eye.
- 2—To be finished as rapidly as possible, consistent with good work.
- 3—To be performed with as little discomfort to the patient as practical (during and after operation).
- 4—Price of the work and the length of time it may be expected to give good service.
- 1—We have a number of patients in Klamath Falls who are glad to go out of their way to show their dentures or bridge work to any one who is interested.
- 2—We never put off a patient with unfinished work to care for a new one (except in emergencies.)
- 3—With nitrous oxide-oxygen gas, we place the patient in an Analgesic state. Patient remains conscious but entirely insensible to pain. Absolutely no after effects.
- 4—Our prices are not high; they are fair and reasonable. Every operation must be satisfactory to the patient, and every piece of work when finished, is absolutely guaranteed.
